Holy Sh—!

I was standing in the little booth area of the PlayStation store at the Metreon the other day...and that was the expression that I heard the most. Those of you who have been there probably know the area I'm talking about. There's a tiny area that's basically a hole in the wall in which there's an extremely large-screen TV. Playing on the TV for hour after hour after hour is a showreel of PlayStation2 footage that shows everything from GT2000 to Madden to Dark Cloud and much more. Every time the reel started playing a crowd would gather—kids, parents, weirdos, geeks, girlfriends that had been dragged in under duress—and when they saw what was on the screen, they were all dumbfounded, gobsmacked, speechless. If there's one thing that the PS2 can do, it's make a video games "non-believer" a true convert within about 20 seconds.

This is all just first-generation stuff, though. Already we're seeing more of what the machine is capable of thanks to next year's products like Metal Gear Solid 2 (we have more shots again this month) and this month's amazing cover-star, Legacy Of Kain: Soul Reaver 2. Only two months to go. Have you ordered yours yet?

BUENA VISTA INTERACTIVE

www.bvinteractive.com

Good news, now you get to be the genius that blew the easy question.

Okay, smarty pants, strap on your thinking cap and let's get down to business. Who Wants To Be A Millionaire: 2nd Edition, is now on PlayStation. Six-hundred questions, plenty of topics, 3 Lifelines, even a 2-player Fastest Finger round. It's just like the TV game show, only without all the commercials. Real questions, real drama, real Regis. And, yes, that is our final answer. (Sorry, we couldn't resist.)

Kickin' It With Style

In and of themselves, regular old grinds aren't very exciting. But when you string multiple grinds together and combine them with a kickflip here or there, it can be just as impressive as a killer aerial trick. Just be mindful of your balance meter so you don't biff.

What is it?

***OPM* psychic sez.**

For a good year now, a most every magazine on the planet has had no less than 23 monthly mentions of Tony Hawk's Pro Skater (and for good reason). Since Grind Session delivers the terrain, imitation comparisons are inevitable and it appears that the old theory is again proven true. A[illegible] not quite as sharp as the original (either, it [illegible] darn close), [illegible] for *OPM*'s full review.

The New Faces of Skating

We all know who Tony Hawk is (and if you don't, go read *OPM*'s in-depth interview back in the July issue). But who exactly are the featured skaters in Grind Session? As you might expect in the skateboarding culture, there are quite a few distinct characters. According to his Web site (www.edtempleton.com) Ed Templeton enjoys veganism and painting his wife in the nude. Cara-Beth Burnside is an Olympian snowboarder and a 1998 X-Games champion, as well as being a rather competent skateboarder. Born in the Philippines, Willy Santos had to resort to skating on decommissioned U.S. Air Force bases. And the man they call Pigpen? A mystery wrapped up in an enigma wrapped up in a flour tortilla.

Disc Problems?

Did you buy a copy of our magazine that did not contain a demo CD? Simply send the receipt in an envelope marked "OPM Replacement Disc" to the address below with the name and address of the store plus your phone number and address and we'll send you the disc. Make sure you specify which month the corresponding disc belongs to in order to ensure you get the right one.

Also, if you have a malfunctioning or non-working demo disc, call SCEA at 1-800-345-SONY. They will provide instructions to obtain repair or replacement services.

Sony Computer Entertainment America (SCEA) warrants to the original purchaser of the Official U.S. PlayStation Magazine that the demo disc included is free from defects in material and workmanship for a period of ninety (90) days from the date of purchase. SCEA agrees for a period of ninety (90) days to either repair or replace, at its option, the SCEA product. You must call 1-800-345-SONY to receive instructions to obtain repair/replacement services.

Copycat RPGs?

That was merely our attempt to emulate the show and its occasional error, like in the Great Lakes fiasco during *Millionaire's* opening run. OK...so maybe Chris goofed. He's been punished accordingly, forced to watch a marathon of that "other" Regis show until he's seen more interviews with Celine Dion and Susan Lucci than any human being should rightfully be subjected to. He won't let it happen again.

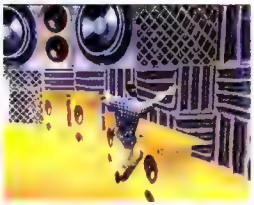
Your cruel, sadistic ruse inspired us. Following your lead, we pasted some huge screenshots of Silent Scope (see this month's PS2 Previews) around fellow editor Todd Zuniga's cubicle, and told him the snipers were after him. As far as we know, Todd is still cowering under his desk in fear for his life.



Axe to Grind

Frisch6969@cs.com

Certainly Grind Session is no Tony Hawk, but it's still a good diversion for gamers desperate for some new skating challenges. Admittedly, a finished Grind Session doesn't hold a candle—or half-pipe or knee pad or whatever—to the version of Tony Hawk 2 that's been floating around the office.

HELLA GELLAR
Are you guys going to keep running Sarah Michelle Gellar pics? It would be a cool trick if you did.

It's not just that she's a real beauty. More importantly, she's actually in a video game.

SPIDER-MANK
What are the chances Spider-Man will be a secret character in Tony Hawk's Pro Skater 2?

We'd love it, but it's not likely. Maybe it's a contractual thing with Marvel, or maybe the hard-core skaters don't want a web-slinger in the game. We'll keep you posted.

How long does it take to write an issue?

We're going to stay ... a secret.

You're magazine is floppy and hard to hold.

What you've proposed to using two hands to hold a magazine? A bit of simple math shows that bigger pages hold more game-related information.

We're certainly curious about the directions the PS2 will take the gaming market. But we're also well aware that the inclusion of a DVD player makes the system more than just a games machine, as Vivid is out to prove. Only time will tell what happens.

THE SOAP BOX

Recently I bought a bunch of older first- and second-generation titles, and in all honesty I'm more impressed with some of these older titles than I am with the new ones. I'm running through Final Fantasy VII for the third time and it's still stunning to me. Some of the game makers are, I think, looking back to make today's titles better. The Legend of Dragoon has taken some major cues from the Final Fantasy series and produced a Class A title that every good role player should own. I've also run through Metal Gear Solid and some of the Resident Evil titles—and if one hasn't yet picked these gems up, go out now and do so! I bought the entire series for under $40 and it's been worth every cent.

PS one™

You really won't believe it until you see it. You've read about how small it is, you've seen the dimensions, and you've heard people say how diminutive it is, but until you actually see it, feel it and hold it, you can't appreciate how precious the PS one really is. Provoking all kinds of responses, from "aww, ain't it cute!" to "ohm god, it's sooo tiny," our newly hatched PS one in the office has become something of a secret pleasure to everyone on staff. People just keep picking it up and smiling. The picture over there on the right hand page is a full size PS one. Really. Those of you familiar with some of Sony's more luxurious products, like the recently released DVD Discman, will no doubt notice that it's not much bigger. **No deeper than a CD case** and only a little bit wider, the system is about as small as you could imagine it ever getting. How did they do it? Well, thanks to the technology for PS2, the guts of the PlayStation now take up hardly any room at all. Factor in the fact that the power supply unit for the system now sits outside of the box, rather than in, and there's not much left to take up the space. Now that PS one is in production, **it will completely replace the familiar PlayStation unit.** Stock that is in distribution and in stores at the moment is pretty much the last of the current generation. Not that the old PlayStation is going to be a collector's item or anything. **There are now 73 million PlayStations in the world**, and Sony anticipates selling another 8 million before the end of the year. U.S. release dates and prices have not yet been set, but expect it to appear in stores before the PS2. We'll keep you posted on the price. In the meantime, enjoy its immense cuteness, and check out the system compared with the existing unit below.

What about that LCD screen?

Not set for release until early next year, the new screen for the PS one is going to completely change the way you can play with your PlayStation. Clipping to the back of the unit, the screen will allow you to play your games away from a TV. The intention is not to make PS one a "portable" like Game Boy or Neo Geo Pocket Color, but more like a "mobile" device to played in the car, on camping trips or when travelling on a plane. The new power supply setup allows you to power the system from a outlet in a car or (feasibly) from some kind of battery pack. As with the system itself, there is no U.S. release date for the screen yet. We'll keep you posted.

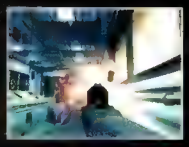
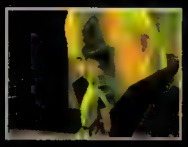
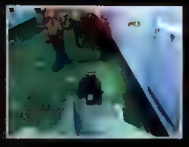
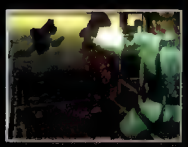
Metal Gear Solid DVD Wows Japanese Viewers









As if we weren't excited enough...

Lucky Japanese gamers are now able to see the Metal Gear Solid 2 trailer that we've been raving about so much since this year's Electronic Entertainment Expo (E3). Konami recently released its MGS2 DVD in Japan, and we just had to pick up a few copies. Along with the mind-blowing MGS2 trailer comes lots of E3 crowd reaction and interviews. There's also some behind-the-scenes footage of Hideo Kojima (Metal Gear's creator) at the show. It's too bad this won't be coming out in the U.S.!

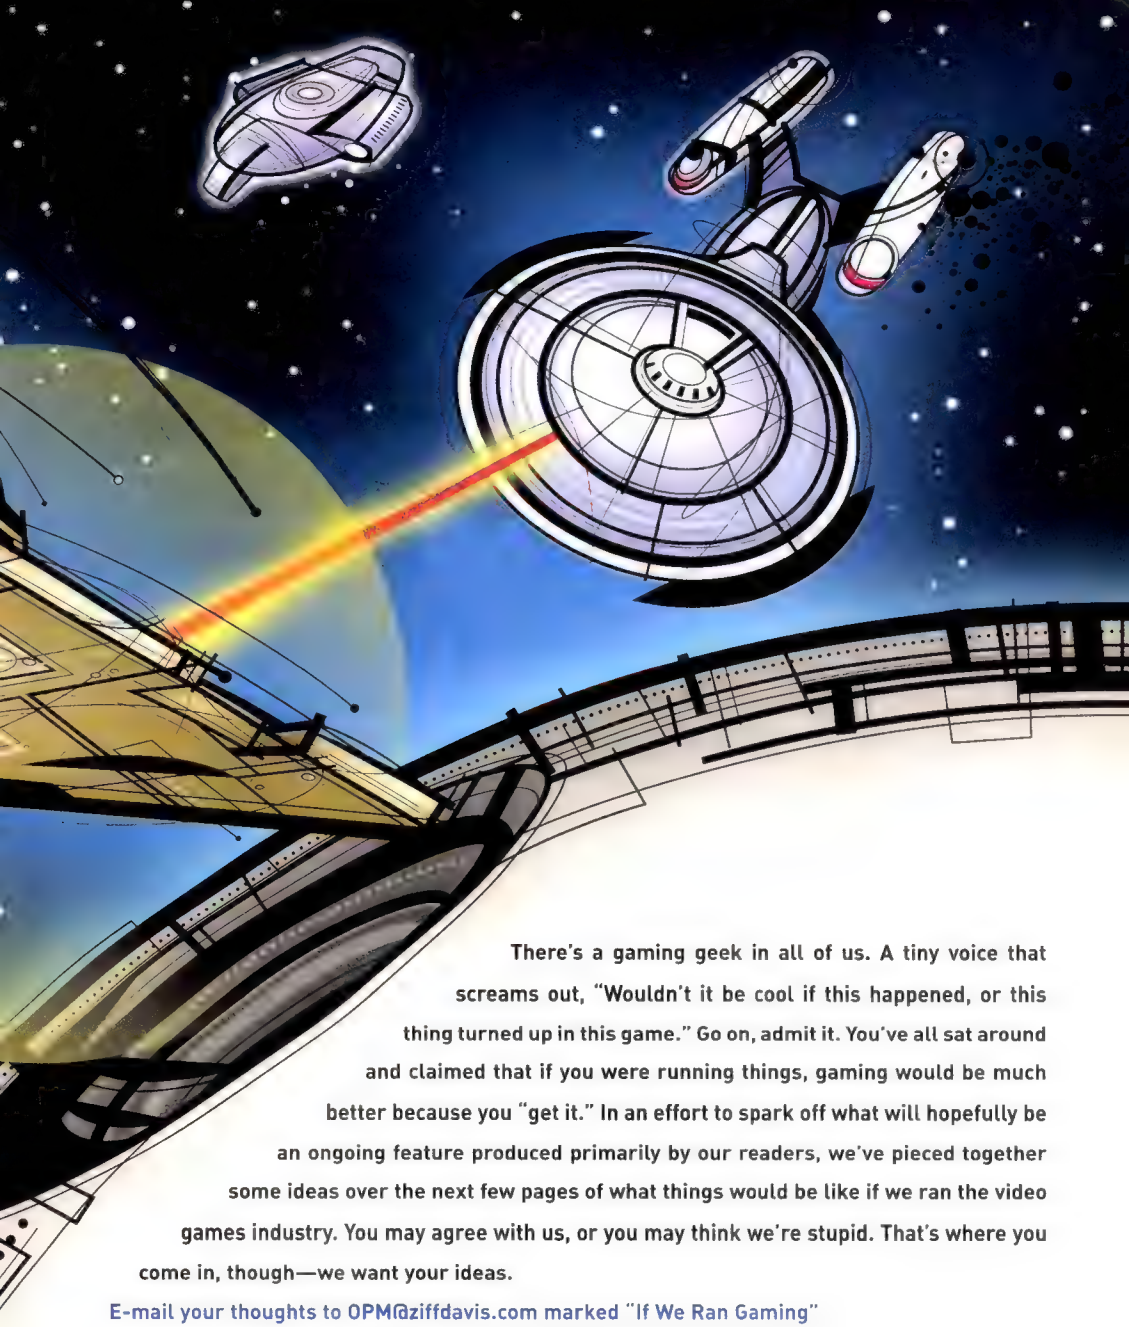
I'VE RAN THE
VIDEO GAME
INDUSTRY



There's a gaming geek in all of us. A tiny voice that screams out, "Wouldn't it be cool if this happened, or this thing turned up in this game." Go on, admit it. You've all sat around and claimed that if you were running things, gaming would be much better because you "get it." In an effort to spark off what will hopefully be an ongoing feature produced primarily by our readers, we've pieced together some ideas over the next few pages of what things would be like if we ran the video games industry. You may agree with us, or you may think we're stupid. That's where you come in, though—we want your ideas.

Understand the Limitations of PS one

Let's face it, there are some crappy-looking games out there right now. The PS one has been around for five years, and [illegible] by now. Why bother? The guys at Novalogic have already done a remarkable [illegible] solid 3D engine for the system, and it's apparent that it can be adapted for all sorts of tasks. We have their phone number if you'd like to get in touch. After graphics, why not take a look at what the system is actually capable of and design around that?

Build the Perfect Mascot

When it comes to gaming icon and pop-culture heroism, Crash is well on the way, but not quite in the same league as some of his competitors on other systems. Now he's sleeping under a Band-Aid bed sheet just yet. Here's our quick guide to video game superstardom:

1) Must appear in several titles without reaching overkill (action platformer, adventure, RPG, fighting, puzzle, sports and racing)
2) Must survive across system generations
3) Must appeal to all ages
4) Cute, but butch enough that guys appreciate it
5) Sense of humor/sex appeal

Outdo EA Sports

Someone needs to take a fresh look at sports games and [illegible] new and different. At the moment everyone is just battling [illegible] same thing over and over again. If Konami or 989 are ever going to [illegible] see some more innovation. While the copycat updates each year [illegible] going to see the genre elevate beyond graphical tweaks and neat [illegible] videos. Just because EA Sports does it a certain way, doesn't mean [illegible]

Funny Games by Funny Dudes

One minute we're blowin' off zombies' heads, the next minute [illegible] dinosaurs. Wonderful games, fun elements, but *way* too serious. [illegible] industry really needs is a comedy. Why not have the Farrelly brothers [illegible] and *There's Something About Mary*) draw up a script involving [illegible] chasing dopily after a leggy dame? It's a simple film yarn that could easily be spun into a humorous game. And if you think the Farrelly brothers are too far-fetched [illegible] ing, why not give *Clerks* and *Chasing Amy* writer/director Kevin Smith a chance to plunge feet first into an RPG script? The long-winded chatterbox pokes lots of sarcastic, character-driven fun while heralding all the difficult angles of the human spirit.

Enough Extreme Sports Already!

Tony Hawk's Pro Skater may have revitalized the genre somewhat, but that doesn't mean we need to see a zillion copycat games that all offer basically the same thing. The next round of "extreme" sports are BMX games. Whoop-de-doo. And you know what? They're pretty much skateboarding games with a guy on a bike [illegible] instead. Just because X-games are cool, doesn't mean [illegible] X-games are. If we have to be subjected to the genre quite so much, let's see some more clever adaptations like Sega's awesome Jet Grind Radio.

Crossover Appeal

One way to potentially spice things up is to take different franchises and bring them [illegible] one roof. It's worked for years in the comic book industry, and sci-fi [illegible] have been gagging for an Alien Vs. Predator movie for as long as anyone here [illegible] member. Crossovers rule. Let's see some neat ideas. Here are a few of ours: [illegible] Indiana Jones [illegible] Wars vs. Star Trek

Which franchise will outstay its welcome first: Sammy Sosa? or Army Men?

Let Us Shoot at Something

For crying out loud, video games get enough crap when it comes to violence. Are light guns really the work of Satan? Let's stop tiptoeing around the issue and release a decent light gun game. It's not like it's a new concept or anything. There was a gun with the original NES, and there were light gun arcade games before that. Right now, the future looks bleak (we hope!), with the upcoming Wild West shipped without the eponymous gun support and Silent Scope lost the keypad.

Return to Old-School Values

How about we see some variety in presentation, storyline and gameplay mechanics for RPGs? Right now the formula is getting pretty staid, some tortured soul has to wander around a distant land in search of some kind of mystical sword/chalice/pixie hat/giant robot foot, while interacting with a host of stereotype characters with dumb names. Random battles ensue, tortured soul goes through some kind of epiphany and realizes that he's actually a good/nice person/spawn of the devil, and proceeds to seek redemption for all the naughty things he'll everdone. Sound familiar? Let's see some ideas that ape stories or presentation styles from long, long ago. Ah, not get some real writers involved to piece the things together? How about a return to the old days when you actually had to build your character from scratch?

Stop Beating Us Over the Head With It

Which franchise is going to outstay its welcome first: Army Men or Sammy Sosa? Gamers don't need to be beaten into submission with big franchise characters. There doesn't have to be a game with the same brand turning up in stores every few weeks. If it's a bad idea and doesn't sell, it doesn't matter how many times you club people with the branding. It's not going to suddenly become a good idea until there's a good experience to back it up. Some series get lucky—the upcoming Army Men Air Attack 2 is a great game that vindicates some of the poor Army Men crimes, but there are other franchises out there that just need to go away.

Sex, Sex, Sex

We're not advocating pornography, just a little eroticism. We've discovered that people everywhere are having sex and they've been doing it for quite some time. Sure, puritanical zealots around America will say, "No Sexual Conduct in Video Games." But, come on, people, we're adults. Think about popular culture. There's not one *Sopranos* episode that screams by without a pit stop at the Bada-Bing (the local strip joint). And look how popular that one got. Steamy romance novels, too, are (somehow) at the forefront of several reading lists. Want women to game more often? Why not try tossing in some sexual tension? If the PS2 plans to bring games above and beyond with the promise of an interactive experience bridging all age and gender gaps, then let's show more than just a little skin after you've successfully escaped a life-and-death situation. On the silver screen, at least, living through a perilous time equates to a man lying atop a woman, lips locked. And while we're on the subject, let's not ignore sexual preference. Where are the gay characters? In the real world there happen to be gay people, yet there are no gay characters in games. What's that all about?

ORSON SCOTT CARD

WHAT ABOUT MY DOG?

Look, I know that Sony doesn't care about me. I'm 48 years old. My reflexes are slow. My fingers aren't particularly nimble. They didn't design their game controller for me. And I accept that.

So it's not about me. It's about my dog. Where's his controller?

OK, I know, the dog doesn't care what's going on when the PlayStation is running. And even if he did, what are the odds he'd ever win? I'm not suggesting that pets should actually play the games—not the games we play. Nor am I suggesting some wacko company put out a bunch of games for people to buy for their pets. No, I'm saying that there should be a controller to allow me to play against my dog.

No, no, stop groaning. This isn't my attempt to get a really dumb opponent. I'm semi-serious here.

In all these games, when we play against the computer, the designers do their best to randomize our opponent as much as possible. They do this so that multiple play experiences aren't completely identical. Something changes. But really, not very much. From place to place, from level to level, you run into the fact that computers are machines. Software is a script given to a machine. And when we play games against computers, eventually we run into the limitation of the computer's fundamental stupidity.

That's where my dog comes in.

What if there were a controller that played upon things my dog likes to do? He rubs up against doorframes, for instance. He licks things. He chews things. Couldn't there be some kind of controller that would respond to a dog's bite or lick or rubbing? Or a cat's scratching or playing? Or even the movements of goldfish inside an aquarium? The game would be designed so that pet-controlled input could create true unpredictability in the movement of the opponents. There would be no trick, no clue, no workaround. You would have to get past a group of opponents who could, given the right input from your pet, defeat you. But, should your cat be sluggish with the fake-mouse cat-pad, you could fight your way past.

Different kinds of games would implement pet input in different ways. What matters is that neither you nor the designer will know in advance what your pet will do.

Your pet might not be very bright—no offense, Dog—but he's a heck of a lot smarter than your PlayStation—no offense, Sony.

But, until somebody wises up and gives us pet-operated game controllers, you'll have to continue to make do with the only semi-intelligent opponent currently available.

Your little brother.

OPM: What makes the PS2 so enticing to you?

Julie Davis: The PS2 has a radically different architecture than any previous or current generation game console. Although this gives the developer far more control of the underlying hardware. There are either two or six different processors on the PS2, depending on how you count them, and passing data between them. Having learned the capabilities of these processors, and understanding how to program them, the challenge is to design the game to balance the load between them. I expect that we'll make a pretty good stab at this time, but over the next year or two, we will continue to refine our techniques, and games (and everyone else's!) will [illegible]

HIT ME

Megadeth's sports anthem sets the tone for UFC

OPM sat down with cool-as-ice Megadeth bass guitarist Dave Ellefson before a recent show in Concord, California. Their song "Crush 'Em," from the *Risk* album, will appear in Crave's upcoming UFC game. They've also been working on their new *Capital Punishment* album. Here's what Ellefson had to say about games, music and the UFC.

OPM: What do you think about "Crush 'Em" being the title song for the UFC game?
Dave Ellefson: It's a huge compliment. We wrote it to be a sports anthem, and particularly something that would be a replacement for Gary Glitter's "Rock & Roll." It's a universal song that could be used for any sporting event—but fits the more manly, crushing events.

OPM: Do you guys play games at all?
DE: Not much lately. I was into Nintendo years ago. Back in the early '80s we had a drummer that got me really into playing Nintendo, so I had the Nintendos, the GameBoys. But recently, not that much.

OPM: Will you pick up a PlayStation2 when it comes out?
DE: Actually, I'm thinking I should get a PlayStation 1 first. My children are real young—my oldest is 4—so they're not at the age yet to be playing games.

OPM: What's new about the *Capital Punishment* album?
DE: With every record we've always tried to break new ground for metal music, or rock music in general. And certainly for ourselves we always try to do it. With *Risk* we probably went as far left as we'll ever get in terms of doing melodic stuff. I think we really pushed the boundary as far as we'll ever go with that. To me *Capital Punishment*—which won't be out until fall the way it's looking right now—is probably the best of the best of what Megadeth does. You know, full bone-crushing riffs, the double-bass speed metal, and melody. It's like we're copying ourselves 10 years later. But hopefully better.

OPM: How long did it take to put together?
DE: Not very long. We started writing some songs back in December and worked through March, and then went in the studio in April. So pretty quick.

OPM: You have kids. Are you worried about violence on TV and in games?
DE: My kids are young, but I certainly keep them away from any television. I basically don't let my kids watch any regular broadcast programming. I mean, age-appropriate stuff is fine. I know when I was growing up, my parents weren't fanatical about what I could and couldn't watch, but I know they didn't want me watching any R-rated stuff—you know, with sex and violence.

OPM: Have you seen any of the UFC?
DE: It's pretty gnarly. It's funny, because we'll be surfing the channels in the hotel and suddenly you see it. The first time I saw it I thought it was pretty insane. It's the kind of sh— you hear about, the kind of sh— you think about, but you never imagine actually seeing it go down.

THE UFC GAME

So what's UFC like as a video game? Here's the skinny. Once the match begins, there's no messing around. You can kick, punch and knee your opponent, or pin him down and bloody up his gums (there are now more than 3,000 moves and 30 different fighting styles, including jujitsu and shootfighting). Now, just because the UFC isn't as popular as the WWF, don't think this game is being pieced together by yokels that don't know squat about going toe to toe. Opus, the developer, has among its credits Fighter's Destiny and Osaka Bay Battle. What's more, current team members have worked on Tekken and Ehrgeiz.

Dead or Alive 2 shows its muscle on PlayStation2

As we told you two issues ago, Tecmo will be releasing a new version of Dead or Alive 2 in the U.S. at or around the launch of the PS2. Titled DOA2: Hardcore, the game will feature some improved graphics as well as new stages, movies and costumes. We spoke with Tecmo's Team Ninja (the developers of the game) to discuss the new version.

OPM: When did you start work on DOA2: Hardcore?

Team Ninja: We started the development the very next day after we completed the Japanese PS2 version. American DOA2 fans should be happy to hear that many of the features that didn't make it to the Japanese version due to time constraints will be on the U.S. version. We carefully studied the feedback received from U.S. players of the Dreamcast version of DOA2 to formulate improvements for DOA2: Hardcore for the PS2.

OPM: What sort of [illegible] have you made for the game?

Team Ninja: We have totally remodeled the lighting and the camera system, in addition to adding morphing and motion blurs to the game.

OPM: What about the [illegible] Japanese version [illegible] DOA2?

Team Ninja: We WERE aware [illegible] much on the issue of "jaggies." Technically the jaggies can be easily eliminated by anti-aliasing, but it consumes the machine's power. If we fully execute the anti-aliasing the overall graphics quality will go down. We'll be utilizing the anti-aliasing function as long as it doesn't get in the way of achieving large-scale/high-quality environments that DOA2: Hardcore will be known for.

OPM: What's the deal about adding new stages?

Team Ninja: Totally new stages will be introduced to the Hardcore version. We took full advantage of the PS2's capabilities and created backgrounds that are super-realistic. But they're more than backgrounds—they allow [illegible]

OPM: Are the stages [illegible] Hardcore going to be all real-time?

Team Ninja: Yes, they will be. For now, we think the real-time model is one of the [illegible] technologies. [illegible] before [illegible] the game and stages.

OPM: Are you [illegible] PS2? [illegible] Are you [illegible]?

Team Ninja: [illegible] PS2 is a [illegible] for [illegible] powerful hardware power of the PS2 [illegible] believe is [illegible] the game.

FEEL THE RUSH

I know you've felt that rush. At the controls of a starship, your point of view staring right down the endless vista of some bizarre extraterrestrial world. Speeding along at tremendous velocity, you point your laser turrets directly at the alien attackers and blast away! Miss. Blast again! Miss and you suddenly hit the side of the cavern and lose half your wing, so you better start paying attention to piloting your ship. Blast! Now you've been hit and your shields are weak. And you know the secret to winning any shootout is to avoid getting shot yourself. Blast! Blast! Blast! Finally, you hit the target and the invader is splattered into a million pieces across the screen in front of you. Did you just play a level from your favorite shooter? No, you're watching *Titan A.E.*, a movie that feels like a video game.

It's no secret that Hollywood movies are taking their cues from exciting game sequences. *Titan A.E.* is just one example of a film that looks and feels as much like a game as anything on PlayStation. It used to be that games were influenced by movies, but now that gaming has become more and more a part of our culture, the movies are looking not only to games for inspiration but also to gameplay itself. Currently when any big summer movie is developed at a studio, the producers look at the script for any sequence that might lend itself to the inevitable spinoff game. They ask themselves, "Can this action sequence be made into a game level?" For *Titan A.E.*, the answer was a resounding "Yes!" In fact, the producers of the game look like they're big fans of Colony Wars, as this space shooter has plenty of the same type of action.

The Wachowski Brothers, the filmmaking team behind *The Matrix*, cited comic books as a source of inspiration, but the nonstop shootouts felt more like Doom, Quake or, better yet, Time Crisis. Neo's superhuman martial arts fighting was more like a bout from Tekken than any normal fight sequence.

The *X-Men* is another movie that was clearly influenced by gaming. You've got the good mutants and the bad mutants getting into fantastic brawls. The only thing missing in the film was the selection screen to choose your fighter to battle it out in three rounds.

Sure, there are some movies that would make great games, but how about some video game levels that would make great movies? And if you don't believe me, I have two words for you: Lara Croft.

Chris Gore is the editor of Film Threat, www.filmthreat.com, and the host of *The New Movie Show*, which airs on Thursdays at 10:30 p.m. on the FX Network. In his spare time, he solves baffling crimes as the costumed avenger known as The Weasel.

STAN LEE

FROM THE COMIC BOOK PAGE TO THE PLAYSTATION AGE

It frightens me sometimes!

To the world at large they're just fictitious superheroes. But I'm beginning to think they have a certain weird immortality—it's impossible to kill 'em!

Spider-Man, X-Men, the Hulk and all the rest who Jack Kirby, Steve Ditko, Don Heck, Bill Everett and I dreamed up a half century ago are not only still going strong in comic books, but have invaded virtually every other form of the media as well.

The X-Men, of course, are already in theaters from coast to coast by the time you read these carefully crafted words. Everyone's favorite web-spinner is scheduled to premiere on screens all over the country in 2001, while the sequel to *Blade* is currently being prepped—as is *The Incredible Hulk* and a whole kaboodle of Marvel's other costumed cavorters, calculated to make this Hollywood's "Decade of the Marvel Superhero!"

You've also seen them on Saturday-morning TV over the years, running, jumping, flying and fighting their little hearts out for the cause of liberty, justice and syndication royalties. And of course they're endlessly discussed, analyzed and argued about all over the Internet.

Obviously, it goes without saying (but I'll say it anyway, 'cause it's my column) that our dauntless do-gooders lend themselves perfectly to video games. With each new movie or cartoon that comes out, you can bet there'll be a rash of new games to satisfy the fans' ever-growing hunger for the excitement, challenges and far-out fantasy that our scintillatin' superheroes represent.

Despite the fact that all of my action-packed overachievers differ greatly from each other (and I use the word "my" figuratively. They don't belong to me. They belong to Marvel—and the entire, eternally grateful world), they still have one thing very much in common. They all seem to be perfect candidates for interactive gaming, especially Spidey and the X-Men, as we've seen this summer.

And now, it's confession time. Even though I really dig the idea of my favorite costumed creations entertaining countless fans on popular PlayStations, as well as on the printed page, I myself have never had the time to become a gaming whiz. Whenever I feel the urge to grab some joysticks, someone'll remind me that there's another script for me to write or edit—and it's naturally due yesterday! In fact, I'm the proud owner of one of the earliest Spider-Man pinball games—a really big, 300-pound, four-legged monster with all the bells, whistles and flashing lights—which stands in a corner of my office. And guess what? Most visitors who drop in manage to shoot a few balls. But me? I haven't gotten around to it yet myself!

But hey, you don't have to be a professional slam-dunker to appreciate basketball or a rhyming rapster to dig hip-hop music, so I can still revel in the fact that so many Marvel superheroes, especially Spidey and our merry little mutants, have carved a huge niche for themselves with the game-playing public. And I vow that somehow, some way, I'm gonna learn to jiggle a joystick with the best of 'em before I shout my final "Excelsior!"

Stan Lee spends most of his time these days helping to develop a new, pandemonious plethora of unique superheroes for his own Web site, stanlee.net. But you might know him better for creating some America's most popular do-gooders, including Spider-Man, the X-Men, the Incredible Hulk, the Fantastic Four, Iron Man and the Silver Surfer.

SPIDER FANS!

If you're like us, then you're counting the days until Aug. 30, when Activision's next 3D action game, Spider-Man, swings its way to store shelves across America. But that's not the only wall-crawler project we're anxiously awaiting! Production for a Spider-Man movie, due out late next year, is now in full swing. As of press time, the Sony/Columbia Pictures film has yet to be cast, though *Evil Dead* director **Sam Raimi** has signed on to direct the potential blockbuster. So, who might don the tights of Peter Parker's alter ego? The rumor mill churns strongly with such possible rising stars as **Wes Bentley** (*American Beauty*), **Scott Speedman** (*Felicity*), **Ryan Merriman** (*The Deep End of the Ocean*), **James Franco** (*Freaks and Geeks*), **Jay Rodan** (*Caveman's Valentine*), **Freddy Prinze Jr.** (*Wing Commander*), **Tobey Maguire** (*The Cider House Rules*) and **Colin Farrell** (*David Copperfield*). Story details remain sketchy, but word has it that Doctor Octopus and the Green Goblin (possibly personified by *The Phantom Menace*'s **Liam Neeson**) will provide some stiff opposition to the web-slinger. You can keep yourself posted on all the latest info at Web sites like www.spidermanhome.com.

There's no trivia and no "Hot Seat." All you have to do is purchase a specially marked copy of a Who Wants To Be A Millionaire: 2nd Edition game for the PlayStation game console, with a game piece attached to the front panel of the packaging (while supplies last). Remove your official game piece from the front of the game, visit our website www.playstation.com and go to the Who Wants To Be A Millionaire: 2nd Edition page, follow the instructions to enter the code that appears on your game piece and see if it matches the winning code. If the code on your game piece matches, you win $1,000,000!*

*Subject to verification of winning game piece and additional terms and conditions. See official rules for details.

"Win a $1,000,000 Sweepstakes" official rules.

1. NO PURCHASE NECESSARY. How to participate: Purchase a specially marked copy of Sony Computer Entertainment America's ("Sponsor") Who Wants To Be A Millionaire: 2nd Edition game for the PlayStation game console, with a game piece attached to the front panel of the packaging, while supplies last. You may receive a game piece without purchase, while supplies last, and a copy of the rules by sending a self-addressed stamped envelope, first-class postage pre-paid (WA and VT residents may omit return postage): Who Wants To Be A Millionaire: 2nd Edition Sweepstakes, Game Piece Request, 1407 Airport Road, Suite 2032, Monroe, NC 28110. Limit one game piece per postcarded request. Mechanically reproduced requests will not be accepted. Winning game piece must be received by Sponsor by 12/1/00. To determine whether you have won a prize, pull the sticker apart and find your game number printed inside. After obtaining your game number, visit www.playstation.com and go to the Who Wants To Be A Millionaire: 2nd Edition game page, follow the instructions to enter your game number and see if you have matched the winning number (subject to verification).
2. Total Prizes: One (1) winning game piece will be randomly inserted among all the game pieces. The total number of game pieces is 450,000. Grand Prize: (1) $1,000,000.00 grand prize. The prize will be paid in equal installments without interest over a 20-year period. Void where prohibited. No cash substitution, transfer or substitution of prize except that in case of unavailability of any prize, Sponsor reserves the right to substitute a prize of equal or greater value. Any unclaimed prize or any prize notifications later returned as undeliverable will result in a forfeiture of that prize. Total value of all prizes: $1,000,000.00. Odds of winning Grand Prize 1: 450,000.
3. Prize Redemption: If the number on your game pieces matches the winning number (verified through www.playstation.com or contacting us in writing), send the original game piece (affix it to a 3" x 5" piece of paper) on which you have hand printed your name, complete address, day and evening phone numbers to: Who Wants to Be A Millionaire: 2nd Edition Sweepstakes, Winning Game Piece Redemption, 1407 Airport Road, Suite 2032, Monroe, NC 28110. For your protection, we suggest that you send prize claims via certified mail, return receipt requested, and that you retain a photocopy of the potential winning sticker for your records. You are not a winner until your game piece has been timely received and verified by Sponsor and you have submitted an acceptable affidavit/release to Sponsor. All prize claims must be received by 12/01/00. Prize claims received after 12/01/00 are void. Unclaimed prizes will not be awarded. The submission of potential winning game piece is the sole responsibility of the participant, who assumes all risk of loss, damage, destruction, delay and/or misdirection of the Sponsor. Winner will be notified of prize verification by mail by 1/15/01. Allow 6-8 weeks for shipment of prize.
4. Eligibility: open to legal U.S. residents. Employees of Sony Computer Entertainment America, their subsidiaries, franchisees, advertising and promotion agencies, and the immediate families and household members of each are not eligible. Winners may be required to execute and return an Affidavit of Eligibility and a Publicity and Liability Release within 14 days of prize notification. Failure to comply with this condition may result in forfeiture of prize. All applicable federal, state and local taxes on prizes are the sole responsibility of the winners. Prizes won by minors will be awarded to parent or legal guardian who must sign and return all required documents. Except where prohibited, acceptance of prize constitutes winner's consent to the use of his/her name, photograph, likeness and/or biographical information for advertising and promotional purposes without additional compensation.
5. The Sponsor and/or its agents assume no responsibility for lost, late, damaged, misdirected, illegible, incomplete, or postage-due mail, entries, prize claims or game piece requests. All game material submitted becomes property of the Sponsor and will not be returned. All winners, by participation in the competition and/or submitting a prize claim, agree to be bound by these rules and the decisions of judges, which are final with regard to all decisions relating to this promotion. Winner releases Sponsor, their directors, employees, and agents, including without limitation, any and all liability, loss or damage incurred with respect to the awarding, receipt, possession and/or use or misuse of any.
6. Game materials are automatically void if they are reproduced, mutilated, forged, altered or tampered with in any way, if they are obtained outside authorized fulfillment channels, or if they contain printing, production, typographical, mechanical or other errors. Liability for game pieces containing printing or other errors is limited to replacement with another game piece, while supplies last. Only the number of pieces stated in the official rules will be awarded. If, for any reason, the number of eligible prize claims received exceeds the stated number of prizes, or any prize level, each prize will be awarded by the stated method through a random drawing among all eligible prize claims received for that prize level.
7. For the name of the Grand Prize winner, send a self addressed, stamped envelope by 1/15/01 to: Who Wants To Be A Millionaire: 2nd Edition Sweepstakes, Winner List, 1407 Airport Road, Suite 2032, Monroe, NC 28110.
8. Sponsor: Sony Computer Entertainment America, Foster City, California 94404.

DVD Horizon

• Although **X-Men** hasn't been out in theaters very long, the DVD's release has already been announced. Look for a special-edition DVD in late November. www.x-men-the-movie.com

• Don't be surprised if Fox simultaneously releases **Titan: AE** for the PlayStation and DVD. The film is expected to release Nov. 7, so expect the game right around then. www.afterearth.com

• Disney will release **Toy Story** on DVD and **Toy Story 2** on DVD and VHS on Oct. 17. Both movies will appear in a two-pack DVD set or a three-disc "Ultimate Toy Box" that will also include the short features Tin Toy and Luxo Jr., as well as the trailer for the upcoming feature Monsters Inc. A perfect purchase to go with your PlayStation 2. Also, keep an eye out for **Dinosaur**, which will hit DVD in Feb. 2001. www.disney.com

• Last we heard the **Star Wars Episode I: Phantom Menace** DVD is slated for a 2001 release. But the cooler news is this: Apparently George Lucas is planning on adding some footage back into the flick to make it a Special Edition. Nothing's confirmed, but a few more scenes gets us extra giddy. www.starwars.com

• For fans of everything simian, **The Planet of The Apes Box Set** will be a limited edition. There will be an extra DVD in the set, but it was licensed for only 100,000 printings. Once that set is sold out, you won't see that extra DVD again. www.foxmovies.com

Sound Station

By John Scalzi

Each month we'll be reviewing albums from the bands that provide the aural soundscape to our gaming experiences. This month we review albums from bands contributing to the Ultimate Fighting Championship and MTV Sports: Skateboarding soundtracks.

Megadeth: Risk
Capitol Records
Track to Listen For: Enter the Arena/Crush 'Em
Dave Mustaine's a rock dude who's not afraid to admit he has issues (if I see another article about how he put the entire band in therapy, I'm gonna barf), but at some point you just have to shut up and rock out. "Risk" gets it right some of the time, especially with Goldberg anthem "Crush 'Em," but too much of "Risk" is Mustaine in a noodly introspective mood that comes awfully close to whining, or Mustaine falling back on seriously tame metal clichés (case in point: "Prince of Darkness"—oooh, the devil. That's original). Suck it up, Dave. You can do better.
Final Score ●●◐

Pennywise: Straight Ahead
Epitaph Records
Track to Listen For: Watch Me As I Fall
I want to like Pennywise more than I do, but they just let me down in the pinch. Sure, they've got a crunchy Cali punk attack, and they certainly provide plenty of value for the money. 17 golden greats on just one compact disc! And they also know how to gripe about the collapse of Western civilization as well as any punk band. But they're just not quite there. Maybe it's the fact they have only one speed (galloping), or that their smart-ass questions are about 10 percent less than it should be. Either one is allowable, but both at the same time? Eh. Close but no cigarillo.
Final Score ●●●

System of a Down: System of a Down
American Records
Track to Listen For: Suite-Pee
Ah, here we go: A high-speed three-car pile up of punk, goth and Black Sabbath-brand heavy metal—and boy, is the carnage ever messy. This churning, roiling slab o' noise is just right for scaring parents, irritating Britney fans and sterilizing pets, but it's also catchy and compelling in its own right. You can listen to it for its own merits and not just because it's bound to alienate those around you. The horrific anarchic state that System of a Down seems to fantasize about will never come to pass (we all like our supermarkets too much), but it sure makes for fine music to play dystopic video games by. Enjoy.
Final Score ●●●●

Cypress Hill: Skull & Bones
Columbia Records
Track to Listen For: Superstar (Rap & Rock versions)
"Skull & Bones" has one CD of rap ("Skull") and one CD of rock ("Bones") although from a time standpoint it could have all been stuffed into one CD. One CD might have been a better idea anyway, since while the rock CD has some serious crankage, the rap CD is mostly the same tired rap clichés, from calling women "hos" to posturing about the mean streets. The hits of the album are rock and rap versions of "Superstar," in which music stars complain how difficult their lives are. Aw, poor, poor babies. Someone should give 'em a huq—or a whack on the head.
Final Score ●●◐

John Scalzi's been reviewing music since back when "grunge" was something you scrubbed off your toilet. So respect him, damn it. Visit his Web site at www.scalzi.com. Also, send him money. Just because.

HOLLYWOOD BANTER

BOUNCE WITH ME

Square has supplied us with some new info and screens for The Bouncer, a fighting game for the PS2. The story revolves around three male characters (Sion Barzahl, Kohji Leifon and Volt Krueger) who work as bouncers at a bar called The Fate. One of the customers, Dominique Cross, is kidnapped by a gang, and the trio must rescue her. The Bouncer is slated for a simultaneous release in Japan and the U.S. later this year.

Are video games better than they used to be?

• **Angelina Jolie** will have to curb her wild ways during the filming of her upcoming movie *Tomb Raider*. Producers have given her an 11 p.m. curfew, according to the Empire Online Web site.
www.empireonline.co.uk

• Tiger Electronics has released an interactive **Yoda**. The 8-inch, Furby-like toy features the voice of **Frank Oz**, who voiced and operated the Yoda puppet in the movies. Not that you can really tell. Like Furby, you can hear the whir of the servos more than you can the badly sampled voice.
www.tigertoys.com

• Warner Bros. has a new script by **William Wisher** (*Terminator 2*) for the next *Superman* movie and is meeting with prospective directors, including **Ralph Zondag** (*Dinosaur*), *Variety* reported. Watch for game publishers to try to snap up the rights soon. Let's hope Titus doesn't give us a repeat performance of their appalling showing with the Man-of-Steel.
www.variety.com

• The *X-Files* producer **Frank Spotnitz** told the Zap2it Web site that the series' eighth season story line is still up in the air. "We literally are figuring that out as we speak, because this is our first week back," Spotnitz said. "But it will be very different from the Mulder-Scully relationship."
www.zap2it.com

• Cinescape Online reported that **Mark Wahlberg** may be in line to star in Tim Burton's remake of *Planet of the Apes*. "People tell me I'm pretty simian, but I think **Tim Burton** wants me to be the **Charlton Heston**," Wahlberg said. Meanwhile, producer **Richard Zanuck** told syndicated columnists Marilyn Beck and Stacy Jenel Smith that there's no role for Charlton Heston in his update of the 1968 film. Zanuck added, "It's not a sequel, it's not a remake of *Planet of the Apes*; it's a reconstruction of the basic idea, a re-imagination of apes and humans." As we go to press it seems that Fox Interactive's game of the franchise is taking a very different tack, and will in fact have very little to do with the new movie.
www.cinescape.com

• The ShowBiz Ireland Web site confirmed a report that **Gabriel Byrne** has been offered a role in *Star Wars: Episode II*. "The people from Star Wars called the other day to offer me something, but I don't know what it is yet," Byrne told the *Irish Star* newspaper, adding that he'd likely accept. He will be joining **Christopher Lee**, the star of numerous horror movies and the upcoming *Lord Of The Rings* epic, who also has a role in *Episode II*.
www.showbizireland.com

• **Joe Nussbaum**, who directed the incredibly popular short film *George Lucas in Love*, will make his feature debut as the director of *How to Eat Fried Worms*, according to *The Hollywood Reporter*.
www.hollywoodreporter.com

• NBC bought the broadcast rights to *Chicken Run*, the DreamWorks animated fantasy film, *Variety* reported. NBC also aired a half-hour prime time infomercial about the movie on June 24. Eidos has the game rights to the franchise (see Previews) and is being extremely bullish about its expectations for the product.

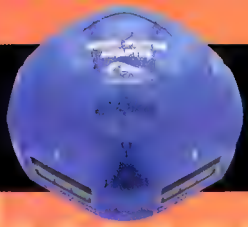
GEAR



Multi Player Adapter

Pelican's bulky, bulbous version of the Multitap works—and that's all you can say about it. At a suggested price of $24.99, it's only five bucks cheaper than Sony's peripheral, so if you have to save the money, this one's a decent choice.
www.pelicanacc.com

Sony 20" Trinitron Wega TV

In a perfect world we'd all be gaming on 60" super-TVs, but for those of us with limited space, Sony's 20" Wega is a great option. The flat screen gives one of the sharpest pictures out there, and the speakers provide kickass surround sound. The price is on the high side (around $450), and it's not widely available, so you might have to order one online. Trust us, it's worth it.
www.sony.com

Palm Pad

Built for children, this diminutive controller (it's about two-thirds the size of a standard Dual Shock) features innovative design, but falls flat in the execution. The buttons are too sticky and the D-pad takes too much effort to move—problems that would surely vex kids and adults alike. If Blaze fixed these problems, this would be a solid alternative for younger gamers. But as of now, avoid this one.
www.blaze-gear.com

Sportster

We've said it before, we'll say it again: We're not big fans of PlayStation racing wheels because most of the time the standard Dual Shock handles much better. But Pelican's Sportster is an exception. The Sportster is quite comfortable, controls well, and does a nice job of minimizing oversteer, a problem that plagues most wheels. But if you already own Pelican's GT2 wheel, don't bother with this one, as it's basically the same peripheral with a few cosmetic changes.
www.pelicanacc.com

Pro Shock Lite

The little brother to Blaze's excellent Pro Shock joystick, this smaller version may be too tiny for adult gamers. The Pro Shock Lite is well-constructed, with a responsive stick and comfortable buttons. Kids (and those with smaller hands) should definitely consider this one when playing shooters and other arcadey games. Those with full-sized fingers, though, should stick with the bigger version.

Big Dave Talks PS2

Dave Perry finds a new home on the PS2

Dave Perry and his development studio, Shiny Entertainment, have been well known for creating some great console games (Earthworm Jim, anyone?) but PC development is what put Perry in the spotlight in the past. Now, though, especially due to the advent of the PlayStation2, Perry and his team are preparing to come back to the console market in a big way. He's currently finishing up a game called Sacrifice, likely his last for the PC—and is hard at work on his first game for the PS2. We caught up with the Shiny boss to talk about the PS2, the games industry, and more.

OPM: Which games caught your eye at this year's E3?
Dave Perry: I *loved* MGS2. It was a show-stopper. The music, the action, the potential of PS2 was demonstrated. Many developers were complaining about PS2 at the show. I think the Metal Gear video set the record straight.

OPM: Will PS2 give you sufficient power even years down the road?
DP: Yes. Consoles are strange beasts. There is *always* a way to milk them more and more. It just takes time to find out how. So expect a good, healthy curve on PS2. By the time the curve is flat, I hope you can expect Santa to be delivering you PS3.

OPM: Should Sony be feeling comfortable right now?
DP: No. Sony has a large crosshair on their head. It's a one-shot kill. Luckily, they're moving so fast that they're no easy target. But they definitely can't stand still for a second, the snipers are out there and they know it.

OPM: What'll be your biggest obstacle with the PS2 hardware?
DP: We're still in the predesign stage right now, so we're only testing the hardware. Clearly texture memory will be our biggest bottleneck. We are heading for photo-realism, something that RAM prices try to thwart at every turn. It's something we will solve, but let's just say that it's no paint-by-numbers.

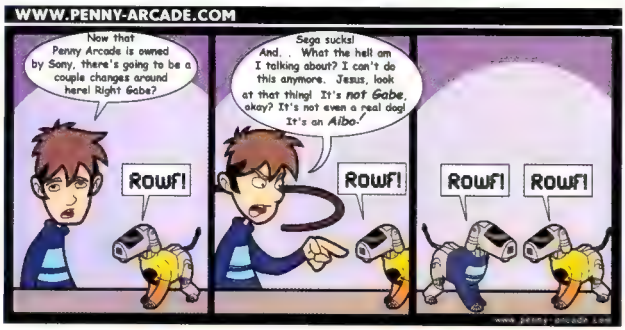
OPM: How long until all PS2 games look like MGS2?
DP: Once you live with developers, you start to understand their plight. They whine and moan about a problem, but the day it's solved—somebody kicks their asses by demonstrating that it can be done. Then they poof all over this solution, stating how they can do it even better. Every day in the video games business is like watching Columbus chart new waters and then the rest of the industry exploring it. The good thing is that anyone can be Columbus—and that's what keeps us all on our toes.

OPM: Interactive Entertainment is potentially more powerful as an entertainment medium than cinema. How far off do you think we are from seeing some really moving gaming experiences?
DP: We discussed this recently at M.I.T. Some people argued that games are already there, and that they personally never cried. Other people, they never have been close to tears. I have been close to tapping the CD into the park on occasion, but I don't let it out of tears. Emotion is our target, but besides the new, quite easy to make technology, it requires fantastic writers, not just a producer. And happens to be your writer because you can't afford a real one.

My prediction was and still is that William Morris, ICM and other Hollywood agencies will start supporting all of the talent that we need for to really work the emotional side of games. Don't think they are sitting on their asses. They are already forming interactive media departments and getting agents involved in this field. So if you are a star producer who can already write a kick-ass narrative, then you will be getting a call from a top agency down the road. I am not making this up. I have already met with them on the particulars of these issues.

OPM: You're using the scalable Messiah engine for Sacrifice, but then also for your PS2 game?
DP: Yes. Three years ago we put our chips on the table stating that scalable engines are the future. Messiah was Shiny's version 1.0, and Sacrifice is version 2.0. Our PS2 game is nearly going to be version 3.0.

OPM: When can we expect to see Shiny's first PS2 game?
DP: It's the most complex game design I have ever been involved with by miles. It hurts my head just to think about all the all parts we're trying to get to interact. It's little. The project is easily going to take a few years. Shiny is taking our return to console game design very, very seriously. It's welcoming home.



RICK THORNE
PLAY WITH THIS

Back in the day, the thought of having a video game completely devoted to bicycle freestyle never crossed my mind. It was all about games like Pitfall and Frogger. Riding was just a positive outlet, a way to be part of something, expressing ourselves and doing something that made us feel good.

Man, it's been like 18 years for me, and I've been there during the "dark ages," when the sport took a crash in 1988. It was difficult to get support from any sponsors. There was hardly any opportunity, outside of the freedom that riding gave me inside. If you needed a bike, you worked to get it, and you sent yourself to contests. I worked in an Olive Garden for seven years supporting myself to get where I am today.

These days, things are different. With the help of TV, more people seem to show an interest in what we're doing. We've also got different sponsors, action figures, Web sites and video games.

So how do I feel about being featured in Mat Hoffman's Pro BMX? Speechless, for a number of reasons. First, to all the people that weren't down with me—like peers at school and other naysayers—they can now play me in the game. I love that. Also, the video game helps solidify our sport to the mainstream public. I think it helps keep our sport alive by giving kids the choice to ride bikes, or at least to know that we're more than a side show at a state fair. Then, let's say you're hurt and you can't ride for three months; the game will keep you in shape, mentally. It's going to be good for the riders to come up with different tricks and lines because, as any pro will tell you, visualization definitely helps.

Plus, what's going to make Mat Hoffman's Pro BMX so good is Activision. Look at their history of games. Look what Tony Hawk's Pro Skater is like. The engine used by Activision is awesome, and that's what's going to be the key factor in making the game fun to play, with awesome graphics and realistic details. That's what sets this game apart from other bike games. It's an honor to be part of this project.

Never in my wildest dreams did I think I'd end up in a video game. It's a compliment, to say the least, and it is definitely a major milestone for the sport of bicycle freestyle. Let's keep on blasting and keep the feeling of riding real.

X-Games veteran, comedian and purveyor of things black *Rick Thorne* does it all, from hosting for both ESPN and MTV Sports to being a featured rider on the Van's Warped Tour. Catch Rick riding vert and street at just about every major contest. He's the one tearing up gravity on a custom, black Hoffman Deep.

Couples Who Play Together Stay Together

As gaming continues to evolve into more of a mainstream pastime, *Official U.S. PlayStation Magazine* continues to introduce some of the couples around the country who game together. This month we chat with Chris, 22, and Kris, 20, a pair from Maryland who are both studying psychology at Bowie State University. Although Kris likes the kiddie games like Tarzan, she'll still go toe-to-toe with Chris at Tekken.

How did you two start gaming together?
Chris: I got my PSX a few months before I met her. I'd play when she wasn't around, but she said she liked playing video games, so we started playing PlayStation together.

Do you compete or play simultaneously?
Kris: We like to compete against one another.
Chris: We play Gekido where we're both on the same team. But we play games like Tekken, Fighting Force and Quake.

Are there any rewards for the winner?
Kris: We'll do it where one has to give the other a kiss.
Chris: I guess we play for kisses.

Has gaming interfered with or enhanced your relationship?
Chris: It's enhanced it. We'll go shopping and we'll want to get a game, and that's something we do together. We'll look forward to that. Or we'll look on the Internet and highlight games we want, and that'll start conversations. Other times, though, she'll say, play it too much.
Kris: I'll say it's his girlfriend.
Chris: My *other* girlfriend.
Kris: [laughing] And I'll say he's pushing her buttons.

Do you think games are too male-centric?
Kris: I don't think it's too male-centric. I don't think women give it enough of a chance. There are games with females, and it gives women a chance to acknowledge that we are in the game system. We can play as the girls and don't always have to be the male player. So, that's nice.
Chris: I think the sexuality is looked at from a male point of view. You know, big breasts and small waists. They're built to appeal to men. Games now have a lot of female main characters, like RE3 has Jill Valentine. And Lara Croft gets a lot of attention from guys, but girls see her and say, "I want to play as her." I think it works out both ways.

When you're playing do you cheat to distract one another?
Chris: You don't want to know what goes on. She'll jump on me or something. It's kind of distracting. But I can still concentrate.
Kris: No he can't. He'll stop the game. I get behind him and get in his ear. Anything to annoy him.

Kris's favorite games
Tomb Raider series, Clocktower games, Tarzan, Bust-A-Groove, Silent Hill

Chris's favorite games
Resident Evil series, MTV Music Generator, Fear Effect, Syphon Filter

What they can't wait for:
PlayStation2, Midnight Club, new Tomb Raider, new Resident Evil, Knockout Kings 2001, Bust-A-Groove 2

What do you think about the violence in games?
Kris: On the Wu-Tang fighting game they have a code to make it more graphic. More games should be like that. You can see all the blood, but if you have children around, you don't have to see it. Most games don't have that option.

Who's the better gamer?
Kris: I don't know. Sometimes I can beat him.
Chris: I'd say me.
Kris: Probably him because he's got more games than I do.
Chris: She always beats me at Bust-A-Groove. And then she beat me once at Need for Speed 3 and once at Quake 2, and she won't give me a rematch.

Do you think there will eventually be more games made with African-American characters?
Kris: I hope so. It should be that way.
Chris: I'm not really sure if it'll happen. The same people making PSX games are going to be making games for PS2. So I'm not really sure. It should, though. Times change.

Which video game character is most like your mate?
Kris: I would say the new one from Nightmare Creatures 2.
Chris: Oh my goodness.
Kris: He's not good-looking, but he's kind of smooth, you know. He's killing people and everything.
Chris: I don't kill people!
Kris: I know, but when he gets mad, you gotta watch out.
Chris: That's terrible.
Kris: [laughing] I'll switch.
Chris: No, I'm not going to get you back.
Kris: I know you're going to say I'm that Urban Chaos lady.
Chris: No. I'd say it'd have to be the girl from Parasite Eve. I love that game. The girl on that game is just sexy.
Kris: Oh, wow!
Chris: They're both slim and sexy. I'd like to see Kris in one of those tight dresses the girl in Parasite Eve was wearing.

1 Tony Hawk's Pro Skater

Last Month: 3 *Activision* ●●●●◐

It's nice to see this incredibly dynamic skate marathon back at the No. 1 spot. With the sequel nearing, there's no better way to get your skate skills down than to play the first. Its incredible replay value has long-time THPS owners still popping this doozy into their PlayStation.

Any game that has half our staff convinced they could take a run at any half-pipe in the Chicago metro area has to be a good one.

And, if you're a big THPS fan who can't wait for the sequel to hit the shelves, we've got a few new screenshots gracing this month's Previews section. Talk about improving on an original.

2 WWF SmackDown!

Last Month: 1 *THQ* ●●●●◐

After an Elvis-like stay as the king of the sales charts, SmackDown! has fallen to No. 2. Is this because The Rock finally grappled the Heavyweight Belt away from Triple H, or just because the anticipation for SmackDown! 2 is starting to build? Either way, this is a game for the wrestling ages, with all the usual suspects in tights (aside from newcomer Kurt Angle).

But someone, please tell us, what's up with this whole XFL business?

3 Spec Ops

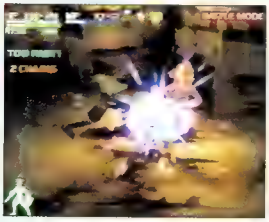
Last Month: 9 *Take 2 Interactive* ●

If a steaming bag of doodie costs $1, does that mean it's a bargain?! No! Why are you buying this?! Just because it's cheap?

4 Syphon Filter 2

Last Month: 4 *989 Studios* ●●●◐

Still hanging around the top of the sales charts. A solid game, but the first one's even better (and less expensive, too).



5 Vagrant Story

Last Month: — *Square EA* ●●●◐

A deep, dark and sometimes disturbing dungeon crawl with fantastic production values and satisfying (albeit somewhat repetitive) gameplay.

Warriors of Might & Magic

Crusaders of Might & Magic for the original PlayStation failed to impress most who played it, but **3DO** hopes to turn things around with its upcoming PS2 installment to the series. Featuring highly detailed environments and a revamped version of the M&M game engine, Warriors offers up a new story of betrayal and redemption. Your character, Aleron, is fitted with all sorts of weapons and special attacks. Look for the game to hit shelves before the **year's end**.

F1 Championship Season 2000

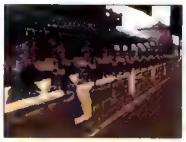
It's **EA Sports**' first F1 effort for the PS2 and the company is going all out to accentuate realism. All of the F1 tracks look better than ever thanks to the PS2's graphic capabilities. Actual F1 talents provided input for the camera placement and audio commentary, and according to EA, your opponents on the racetrack will emulate the performance of their real-life counterparts. Also, two players can go at it via split-screen. Look for F1 Championship Season 2000 in **November**.

Dynasty Warriors 2

In a field of many, you are but one

KOEI boasts its PS2 **launch** title as "a new type of action game"—and they just might be telling the truth. Instead of hack-and-slash, [illegible] the game's premise draws from the traditional 2D fighting genre. [illegible] PlayStation original, it's kind of adding a new twist to the battle-filled experience. Instead of [illegible] one-versus-many, [illegible] over 1,000 warriors. Just imagine your [illegible] Mel Gibson in a Chinese Braveheart and you get the general idea.

After you've chosen your favorite of the warriors from each of the three warring kingdoms, it's time to hit one of the 360-degree battlefields and spanning over one square kilometer in size. Equipped with your favorite sword, spear or bow, use your combo and special attacks to take on everyone from your enemy's foot soldiers and archers to famous warriors found in any Chinese history book. Don't forget to [illegible] away. With [illegible] kill [illegible] you've seen, though, you must always keep an eye open for trouble spots in enemy lines, making sure that yours doesn't grow weak at the whole. And don't forget to help out any friends in need—you can even hear their screams. Look for more info next month.



Gaining a Rep

As you play through a campaign in DW2, don't expect your valiant efforts on the battlefield to go unnoticed. With each victory—and with the help of special items found during skirmishes—your statistics rise, as do your reputation and rank. But don't expect your prowess to go unnoticed by the enemy. Once you become a celebrated warrior, they'll see you as such, sending their finest soldiers against you. Better yet, the weak will run away!

Gradius III and IV

Long live the 2D shooter!

"These sequences show what the PS2 is all about," says Konami's Jason Enos. He's not kidding. From mysterious red planets with living faces on them to a trench run straight out of *Star Wars*, the game's opening is downright awesome.

Motor Mayhem

Infogrames is hoping to create a new franchise with Motor Mayhem. If all goes as planned, the game will kick off a series of titles based on the fictional Vehicle Combat League (VCL). As a sort of ultra-futuristic Twisted Metal, MM focuses on nine unique, varied characters (rather than on the vehicles alone). You can even customize your ride extensively as you compete with up to three other players in eight destructible arenas. The VCL gets underway **early next year**.

Red Faction

Volition, Inc.—the fellows behind Descent and Summoner—set out to create a first-person shooter with a fully destructible environment, and Red Faction is the spectacular result. Slated for release from **THQ** in the **first half of 2001**, the game adds lots of nifty features to the FPS formula, like weapons with heat-sensor readouts; a stable of land, sea and air vehicles; and, of course, the ability to blast holes anywhere in walls, ceilings, floors, and just about anything else.

Shadow of Destiny

Travel through time to save your neck

You're dead. Unsuspectingly, you were stabbed in the back. You don't know who did it. You don't know why. But thanks to a mysterious man who has transported you back in time 30 minutes before your death, you've been given a chance to prevent your demise. And prevent it you do, but not for good. Death can't be evaded so easily—and it's making your life a living hell. Only by transporting back to four different time periods—1500, 1900, 1980 and 2000—can you hope to restore your world to normal. In each period you're given a certain amount of time before you die, and actions you make in the past can affect the future. **Konami** will bend the time streams **later this year**.

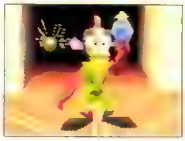
Spyro: Year of the Dragon

PlayStation's most loveable lizard returns

The newest edition of **Sony CEA**'s ultra- [illegible] far. The keyword this [illegible] Dragon is actually some [illegible] mishomer, since the game includes five playable Critters in addition to the loveable Spyro [illegible] And Spyro himself will be seen riding a skateboard, piloting a mini-submarine, blasting enemies [illegible] red through the game's 37 level [illegible] e Dragon's levels being 150 to 200 [illegible] the game is released in **late October** [illegible] earned in Spyro [illegible] like swimming, c[illegible]ing [illegible] o longer require an enemy kill [illegible] ation.



Supporting Cast

In Year of the Dragon, you control everything from a boxing Yeti to a genetically engineered space monkey. Players can now even take control of Spyro's dragonfly companion, Sparks, in a top-down, Gauntlet-inspired minigame. Here's a look at the game's motley cast of characters so far, clockwise from below: Sheila the Kangaroo, Sgt. Byrd the flying penguin, Bentley the friendly Yeti, and Agent 9, a genetically engineered space monkey.

Team Players

As with Mega Man X4, X5 allows you to choose either Mega Man X or Zero to battle your way through the stages. As X, you jump and shoot using your arm cannon in typical Mega Man fashion. But as Zero, you must alter your strategies, as you come only equipped with a Z-Saber. Also, instead of gaining new weapon upgrades like X, Zero learns new fighting tactics as he defeats foes. Using Zero makes the game significantly harder, but adds diversity.

Art of War

PE2's new battle system features lock-on targeting and more freedom of movement, but those aren't the only additions. Some weapons now have alternate methods of fire, for example, allowing Aya to fire a single round or a short burst, which can be useful when aiming at inanimate objects in the background. Plus, now battles range through a series of screens rather than being confined to a single room, letting Aya get a little breathing room.

All the world's a skatepark

Our jolly meter has steadily risen over **Activision**'s sequel to th greatest skating game ever, but all the previous buzz was based on expectation and the one level featured on our July demo disc. Now we've got a full-scale playable in our greasy mitts, and it has managed to cast the identical spell of the first THPS. Trying to spell K-A-T-E in Philly? Hunkering down for a two-minute session that turned into two hours was more the norm. [illegible]

With an enhanced Career Mode, THPS is the [illegible] ity. There are 10 tasks per level, ranging from scoring [illegible] points to perform ng a kickflip over an only-reachable-in-a-vide game gap. Success in these tasks y elds rewards of cash, not vide tapes and the dough can be spent on better boards or to build up one of 10 skills, including landing, spinning, lip balance and speed.

Want evidence to the Career Mode dynamism? In the New York level you must acquire five subway tokens spread around the d[illegible] ngly huge area to unlock the subway escalator. Then, you ca skate your way over to Brooklyn Banks via the elevated train track to discover an entirely different part of the Big Apple. THP[illegible] heelflips into stores this **September**.

Back to School

Anyone who's witnessed a skate video even in passing has likely seen spots from the THPS2 level known as "The School."

"We created levels with recognizable stuff because maybe you've seen that in real life or on a video," says THPS2 producer Scott Pease. "It really feeds the imagination of what you're doing."

"The School" is a conglomeration of popular skating spots. In this level, you'll even find the legendary "Leap of Faith."

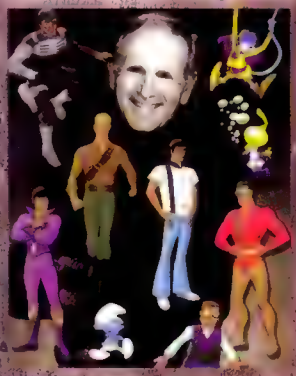
From Smurf to Vampire

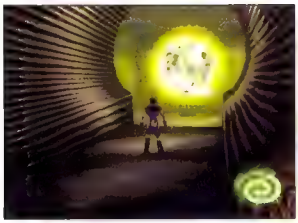
Crystal Dynamics is serious about their voice work. Just check out the expansive resume of Michael Bell, the voice of Raziel: Here's a guy who's gone head to head with opponents ranging from Jean-Luc Picard (as Groppler Zorn in *ST: TNG*'s premiere episode) to the evil wizard Gargamel (as Grouchy, Lazy, and Handy Smurf in *The Smurfs*) and has had roles in everything from *The Monkees* to *G.I. Joe*.

"Soul Reaver is a class act," boasts Bell. "A professional director [Gordon Hunt, *Mad About You*] is a luxury, and the project fares better for the input."

And how does it compare, we wonder, to animation work? "Acting for a video game brings with it a different set of rules. For all intents and purposes, an animated show is equivalent to performing for radio. Sometimes you work with a full cast and other times by yourself, but you always work in real time. By that I mean, you are performing as the character in a situation and at a speed not unlike that of an on-camera gig. With a video game script, you need to be clear enough that the players understand their roles in the action. You try not to go over the top. No room for the method here."

But while Crystal may be serious about Bell, Bell is far from serious himself, tossing out comments about how he "slept with everyone on Star Trek including the caterers...especially the caterers!" (We're pretty sure he's kidding.) And when we ask what he thinks of Soul Reaver, Bell's response is characteristically outlandish: "One evening, I decided to play Soul Reaver and only stopped when my wife announced that our daughter had graduated college. She was 12 when I sat down."





changed over the years, Amy ponders. In some ways I find him an ever [illegible] ing character than Raziel because there's [illegible] complexity to him. Raziel, ironically, is more [illegible] dimensional than Kain at [illegible] because less of his back-story has [illegible] Raziel is flawed, too, though. There's villainy in Raziel, and there's heroism in Kain—and I hope that's fairly evident throughout the dialog in the first two games. Amy [illegible] that is very much the focus of the series, though. If you remove the melodrama and [illegible] elements of his character, [illegible] flawed. Depending on how you look at things, you could call him a tragic hero or an anti-hero. In my opinion, characters painted [illegible] aren't interesting. They're too two-dimensional [illegible] one is ever really so uncomplicated. Everyone [illegible] has their motives for what they're doing, everybody believes they're doing the right thing within their belief system. REAVING

Sound Department: Kurt Harland, Greg Shaw and Jim Hedges

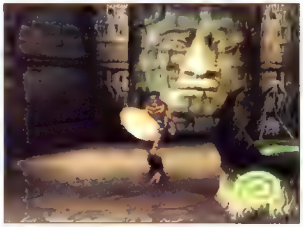
THE EVENTS OF BLOOD OMEN

- Mortanius announces Kain's assassination. Mortanius is in control for now; not Nash'ak'gik, as the village of Ziegsturhl, Kain is ambushed by brigands, who murder him by impaling him with a sword.
- Kain's body is interred in a crypt west of Ziegsturhl.
- Kain awakens in the underworld, where Mortanius offers to revive him, so that Kain may take revenge upon his assassins. Kain, heedless of the cost, accepts the necromancer's offer. The catch: in order to return to the world of the living, Kain is reborn as a vampire.
- Kain awakens, and begins his "career" as a vampire.
- Kain finds his assassins and kills them, putting his revenge—but Mortanius drives him on to the Pillars, saying that the brigands were only the instruments of his murder, not the cause.
- Kain visits the decaying Pillars for the first time, meets the spectre Ariel, and learns the nature of his quest. The Circle—the sorcerers poisoning Nosgoth—must be destroyed for the land to be healed and the Pillars righted. Ariel promises him release and peace when the Balance is restored.
- Following Ariel's direction, Kain [illegible] kills [illegible]

Finding the Perfect Noise

Crystal Dynamics' experienced sound department isn't content to rely on prefabricated sound effects to convey the proper atmosphere of this moody game. So one sunny afternoon in Menlo Park, the whole Soul Reaver team gathered on the back patio of the Crystal offices to smash watermelons, pound on raw meat, break paving tiles and crush soda cans amidst a ring of microphones—all in an attempt to make a perfect noise.

"This may not sound like much," says sound designer and composer Kurt Harland (pictured above; you may recognize him from the new wave band Information Society) as he plays a recording of a crunching Coke can, "but if we drop it a few octaves we get *this*." The unmistakable sound of a sliding stone block fills the studio. "It's a long, tedious process," says Harland, "but it's worth it."



"THE GAME WILL HAVE A PROPER ENDING THIS TIME"

A BRIEF HISTORY OF NOSGOTH

THE EVENTS OF BLOOD OMEN (cont.)

- Kain confronts the immortal warrior Malek, who knows, Malek strongheld, but Malek escapes him.
- Kain meets the Oracle of Nosgoth, a recluse prophetess who holds court in the arctic caves.
- The Oracle warns Kain of the Sarafans of the Nosgoth attacking from the north, of the berserker King Ottokar of Willendorf, helpless to withstand their attack. She gives Kain a vision, showing an [illegible] planted by mortals the Pillar of Dead.
- Kain discovers each of the pillars, leaving one, Pillars of the dead.
- Ariel appears and reveals to Kain that he is the Priest of Balance, and that the only way the Pillars can be healed is for him to sacrifice himself to the Pillar. The consort's war with the Dead, climactic decision: sacrifice himself to heal the world, or release the sacrifice and absorb the world's corruption. Kain chooses the latter path, deciding to rule the world in its corruption rather than [illegible] himself to [illegible]

The Soul Reaver 2 Team

"Vae Victis!"

It may surprise you to hear that Soul Reaver 2 isn't the only Legacy of Kain game in the works. Due around Christmas of 2001 is an alternate sequel to the original Blood Omen: Legacy of Kain. This as-yet untitled project is set 200 years after the first game, and follows the further adventures of the vampire Kain as he prowls the streets of a human city called Meridian. As in the original Blood Omen, you'll need to feed on human blood in order to keep your strength up—but in this bustling city, you're well outnumbered, so you'll need to rely on stealth and cunning to survive. If it comes to outright battle, you'll find a much more varied combat system than in the original game. Kain will engage in proper guard-parry-thrust sword battle with his human enemies, and will also have a number of spectacularly gory special moves at his disposal—as well as certain magic learned in the original game. Even at this early stage, the game looks phenomenal; we can't wait to see more.

THE FINAL SCORE

We rate games on a five-point scale. So, .5 is terrible, 2.5 is average and 5 is superb. Get it?

I Am Not Hardcore

[illegible]

I read game manuals. [illegible]

I don't buy import games. [illegible] for a living, I even [illegible] B [illegible] import [illegible] bragging that I played it before [illegible] rather wait until it's properly localized, [illegible] that's just [illegible] However, that bumps [illegible] hardcore gamers. Whatever.

I actually like Spyro the Dragon. Now, don't get me wrong here. Many hardcore gamers [illegible] that the Spyro games are [illegible] corporate creation, so cute that [illegible] blah blah blah. You know what, [illegible] think Spyro's cute. I realize he was [illegible] in order to sell games—and [illegible] like him.

I hate anime. Maybe it's misplaced affection for all things Japanese. Or maybe it's because lots of Japanese games are influenced by anime (and vice versa). Either way, anime and video gaming have become inseparably intertwined in the psyches of hardcore gamers. This love for anime is also blind, encompassing even some of the worst of the genre—[illegible] absolutely clear on how I feel about this. Most anime sucks. Period.

I don't believe in absurd challenges. [illegible] back in the early days of gaming, [illegible] difficulty was a virtue. After all, it was just about the only variable you could program [illegible] those ancient machines that would lengthen the game time. But I'd like to think video game technology has evolved enough so that it's no longer necessary [illegible] the solution and one times in order to get past that obnoxious [illegible] wizard wyvern. [illegible] according to my hardcore peers, it's [illegible] those kinds of [illegible] that make gaming worthwhile.

[illegible] and breathe video games, I'm just [illegible] according to real gamers. But I'm not [illegible] gamers muddle through their Japanese [illegible] what's really going on. Let them download [illegible] FAQs for their import titles. Let their [illegible] through unbeatable levels. [illegible] games for what they really are: good, [illegible]

Developer Lost Toys

This next addition to Take 2's line of Sports titles is the first to really show the promise of this budget line. Ball Breakers, with its spherically mobilized combatants, feels like **some odd descendant of Marble Madness**.

The game's most impressive feature is its variety. Each environment includes a number of different challenges, from simple races to more interesting pick-up-the-King of the Hill. At Last, Ball Breakers is a bit lacking in balance and polish, the sharp graphics—not to mention the price—makes this a forgivable flaw.

Fans of the original dance-'em-up will no doubt be curious about the sequel. It's been quite a while coming, but is it an improvement? Um... Well, there are 12 new songs that span a variety of genres from hip hop to jungle and there are 11 venues in which to strut your funky stuff. But **the gameplay itself is virtually identical to the original**. Tap the buttons on the beat and earn points for being groovy. Enix boasts that there's an "all-new scoring system" but I have absolutely no clue what this means.

There are 18 characters to choose from (once you've opened everything up) and these range from the cooler of the original [Hugo's back, among others] to some utterly ridiculous-looking dudes that can't understand. Why, for instance, would you want to dance as a crappy-looking wooden doll? It's not cool. It's not pretty, and it dances like it's laying over. As before, the dance moves are all motion-capture'd and very convincing-looking. But who has time to watch the moves when you're concentrating on tapping the buttons in time? You end up zoning out completely, much like you do when playing PaRappa, and if your concentration wavers for a second, you forget which way is up on the joypad, and which button is which. Ultimately though, it isn't really anything more than the original. **I'm not sure why they bothered.**

Chrono Cross

It's more than about time for Chrono Trigger's sequel

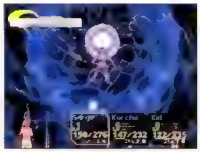
Publisher Square EA
Developer Square Soft
Web Site www.square-soft.com

[illegible] it's someone else's. No one recognizes you. You then find out why: you're dead. You've been dead for more than 10 years. But what of your years of memories? Has your life just been one long dream? Moreover, how are you present if you died many years ago?

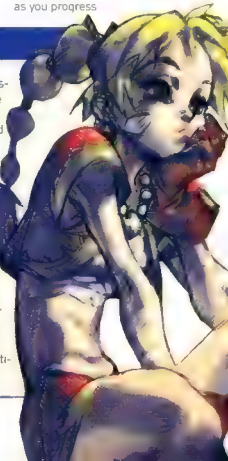
This is the beginning of Chrono Cross, deeply engrossing and extremely thought-provoking story. As you delve into it further, you realize that the existence of parallel dimensions. In one, you are alive and in one you are dead. And it's your intention to find out why.

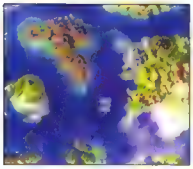
For those unaware, Chrono Cross is the sequel to the Super NES game Chrono Trigger, my personal favorite RPG of all time. So naturally, had nothing but the highest expectations for this game. Amazingly enough, they were more than surpassed. **Chrono Cross is pure magic—any Chrono Trigger fan's dream come true.** While the game doesn't continue the characters or story of the original, it perfectly weaves in familiar elements as you progress.

MAGIC & ELEMENTS



Chrono Cross' intricate magic system is based on elements. There are six different element colors: white, black, blue, red, green and yellow, and each character has an affinity toward certain ones. You're given a grid that will allow you to place elements that you find or purchase on it, and position on this grid will alter effectiveness. As in the original Chrono Trigger, eventually you'll be able to perform combination element attacks. A color graph in the corner of the screen keeps track of element color usage. This graph plays an important role for statistical boosts during battles.





While the story immediately had me interested, it was the innovative battles in Chrono Cross that really got me hooked. **Never before have I seen such ease and depth involved in a game's battle system.** First of all, as in the first Chrono Trigger, all battle encounters are visible on-screen, so they can be avoided. Additionally, you're allowed to run away from a battle at any time—even with bosses. Inside the battles, Chrono Cross gives each character seven stamina points. And while the fights are carried out in the standard turn-based fashion, you can select to use any character as long as he or she has stamina remaining. Players can then choose to unleash a weak, medium, or strong attack based on the amount of stamina available. And the ability to switch to other party members in the middle of an attack adds lots of strategy. Once a battle is over, you're given the option to automatically heal your party—the game will search through your available inventory to replenish your team's strength. This is one of the greatest additions to the RPG genre.

Graphically, Chrono Cross is incredible. **It may not have the glossy look of the Final Fantasy games, but in my opinion, this is better.** And aurally, CC is a masterpiece. The soundtrack, once again scored by Yasunori Mitsuda, is one of the finest video game compositions ever. A few of the original game's songs have been masterfully redone, but most of the music is new. However, even these new pieces often reference older Chrono Trigger melodies—sometimes with just a four-note phrase—that only devotees would recognize. They sent chills down my spine.

Chrono Cross will surprise people with the amount of acquirable party members—over 40. This may sound like an excess, but every single one is a worthy addition to your party. And having all these characters does wonders for the game's replayability—you'll need to go through more than once to obtain them all. Also, each will offer unique opinions as the game unfolds, which makes it worthwhile to go back and acquire them all.

While Chrono Cross certainly does not have the hype of Final Fantasy games, it has a special magic that can't be denied. Not only does it offer much innovation for the RPG genre, Chrono Cross is one with a polish rarely seen in games today. **In fact, Chrono Cross has become my favorite RPG for the PlayStation.** And I can't think of much better praise than that.

SERIES RECAP

Released in 1995, Chrono Trigger for the Super Nintendo is widely regarded as one of Square's greatest games of all time. Featuring the talents of Hironobu Sakaguchi (Final Fantasy), Yuji Hori (Dragon Quest) and Akira Toriyama (Dragon Ball Z), Chrono Trigger required you to travel through time in order to alter events in the past and future.

A pseudo-sequel soon followed in Japan called Radical Dreamers. Few gamers ever got to try it, though, as the title was only available through Nintendo's Satellite service in Japan. Much of Chrono Cross is based on that game.

And granted, the story is just a flimsy excuse to play the [illegible] MRSF [illegible] counts, with a **deep yet accessible battle system and sublimely balanced artificial intelligence**.

"Aaawwwww, yeahhh." The catchphrase of Mortal Kombat: Special Forces' main character, Jax, sums up the quality of this 3D action/adventure nicely—but only in its originality and [illegible] that back. Now, **what specials they do have tend to be pretty damn cool** – I don t think I've seen many more stylish moves than Wolverine s *Matrix*-style spinning kick—but even the coolest looking moves get tiring after awhile. Also problematic is the lack of an in-game move list, this is crucial to mastering a character in a fighting game, and neither the manual nor the Academy Mode includes a complete list.

Other complaints include the limited character roster, the fixed progression of enemies in Arcade mode, and the sometimes-slippery controls—especially for the more complex moves.

But the game s far from all bad. Paradox did do **a fine job of presenting the characters accurately**, complete with proper settings. The graphics overall are extraordinary, especially in the crisp, detailed arenas, my only complaint in terms of look s the somewhat stiff anima tion. Melchiah

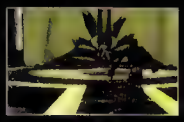
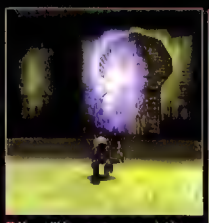
■ **Difficulty:** Easy
■ **Reward:** Phasing Ability
■ **How to defeat Melchiah:** Melchiah is pretty slow moving but he will tag you if you get too close. Keep moving, and you will have nothing to worry about.

1. **Lure Melchiah to one of the side rooms.** Enter through a hole that's high up. Hold the lever until the boss is underneath the gate. Smash his head with the sharp gate, and escape to the room on the opposite side.
2. **Repeat what you did with the last room.** He should be bloody by now.
3. **Hurting him a second time will free up the crank** on the pedestal. Lure Melchiah into the center cage. Run quickly out of the cage and turn the crank. Melchiah will be defeated in a gruesome fashion by the giant spinning blades that fall from the ceiling.

■ **Lure Melchiah to the side rooms,** and try to pin him with the gate.





■ **You will have to move quickly** to find and strike Kain down.

Kain

■ **Difficulty:** Moderate
■ **Reward:** The Soul Reaver sword
■ **How to defeat Kain:** Kain's pattern is surprisingly easy, though a little tricky when it comes down to execution. Kain will teleport to one of three set locations around the Pillars of Nosgoth. When he appears, he will start to charge up the Soul Reaver. If you get hit, you will automatically be sent to the Spectral Realm. All it takes is a single claw swipe to knock Kain out of his weapon charging. It will take three hits to end your fight with Kain. If you are in the Spectral Plane, avoid the two wraiths that are found circling the Pillars of Nosgoth.

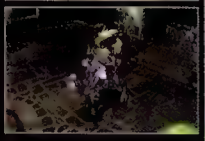
Aftermath: Kain will attempt to use the Soul Reaver on you, but the sword will shatter. To claim it for yourself, enter the Spectral Realm and grab the ethereal form of the sword.

Mini-Boss: Morlock

■ **Difficulty:** Easy
■ **Reward:** Telekinetic Force
■ **How to defeat Morlock:** Leap over to the central platform while dodging his telekinetic blasts. If you have the Soul Reaver, hit him three or four times with it, then drain his soul. If you do not, pummel him with your claws, then throw him into the water.

His attacks are extremely powerful, so you stand a good chance at being tossed into the water or back to the Spectral Realm.

Defeating Morlock isn't too tough as long as you keep moving. He is the first enemy that will shoot telekinetic blasts at you.

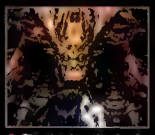


■ **Get in close** and start hitting him with everything you've got!

Zephon

■ **Difficulty:** Moderate/Kinda hard
■ **Reward:** Wall Climbing
■ **How to defeat Zephon:** Zephon will swing his legs in an attempt to impale you. If you get too close to his head he will snap at you.

1. Try to get Zephon to take a swing at you. If his leg sticks in the ground, take a whack at it.



2. The shock and pain of losing a leg will force him to drop out an egg. It will appear as an orangish oval-shaped thing in front of his belly.
3. Dodge Zephon's attacks and pick up the egg.
4. In the back of the room is a dead vampire hunter with a still-lit flamethrower. Hold the egg in the flames to ignite it.
5. Turn back toward Zephon and throw the egg at him. Repeat this two more times and Zephon will be no more.

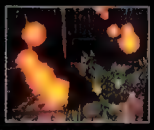
Rehab

■ **Difficulty:** Easy
■ **Reward:** Swimming
■ **How to defeat Rahab:** Rahab and his kin have evolved to the point where they are no longer harmed by water. However, the Rabahim still have a susceptibility to sunlight. This is the weapon you must use against the aquatic vampire Rahab. To obtain the ability to immerse yourself and swim in water, defeat him.

Dumah

■ **Difficulty:** Hard
■ **Reward:** Ribbon
■ **How to defeat Dumah:** Enter Dumah's throne room while in the Material Realm. Pull out all three stakes that pin him to his throne. This will bring him back from the dead. With Dumah awake, he will start to attack.

Whenever this boss stops, it means he's going to stomp the ground. When he does this, leap up and glide. If you are on the ground when he does this, you will be stunned. If Dumah reaches you, he will use the ribbon attack on you and you will lose a lot of health. Move slow and steady and lure him to the furnace room. Once inside, turn on the gas, then trick him into standing within the central section. Then turn on the burners and watch the last of Kain's corrupted be destroyed by the purifying flame.



Final Kain

■ **Difficulty:** Easy
■ **Reward:** the ending...
■ **How to defeat Kain:** This is the final battle, and Kain will move significantly faster than the last time you met him. However, you will defeat him in pretty much the same way.

Kain will teleport to one of the massive stone steps. Once he appears, he will start charging one of his powerful attacks that will spell your demise. As soon as you see a blue glow, head for it as fast as you can. Hit Kain with your Soul Reaver, and he will teleport away to a higher step. Once again, make your way to him and slice him. He will teleport once more to an extremely high up step. You must move quickly to reach him. Once you stab him, Kain will take leave. Enter through the portal that is found nearby, and you will be treated to the ending.

Raziel's Items, Foes

Teleportation made easy: Throughout Nosgoth, you will find portals that you can walk through. These will teleport you back to any portal you have previously visited. Always activate them.

Takes you to: The outside ledge just to the left of Nupraptor's Fortress.

Takes you to: Raziel's ruined clan territory, just past the huge gilded gate.

Takes you to: Upon entering this mark into the portal, you will warp to Zephon's lair.

Takes you to: This will place you outside the Cathedral's entrance.

Takes you to: Wanna fight the final encounter with Kain, enter here...

Takes you to: This rune will send you straight to the heart of the oracle.

Takes you to: Warp to the start of the Ash Wastes upon entering this rune.

Takes you to: Enter and you will surface in an underwater region by the Sunlight Glyph.

Takes you to: The cave entrance leading to the Abyssal Vortex.

Takes you to: The location this portal will take you is the hidden human city.

Takes you to: You will find yourself right outside the Tomb of the Serafan.

Takes you to: The Melchian clan territory, just before the large lake.

Takes you to: Enter this portal to find yourself outside the Drowned Abbey.

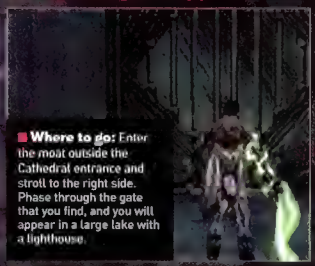
The Sound Glyph

Where to find it: Enter the Cathedral and fall to the bottom of the first wind elevator. Look for the stained glass window and break it with the telekinetic force blast. Climb up to the passageway.

Grab the mallet: At the far end of the large room is a mallet. Grab it and climb up the wall near where you entered. Throw the mallet to the first cliff on the left. You'll see why in a minute.

Shifting Realms: Enter the Spectral Realm and jump to where the mallet is. Re-enter the Material Realm. Collect the mallet. Now jump 'til you are on the farther pillar. Put the mallet down and break the stained glass with another projectile blast. Toss the mallet across and make your way to the other side. Use the mallet on the bell and you will be awarded with the Sound Glyph.

The Sunlight Glyph

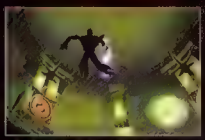


Where to go: Enter the moat outside the Cathedral entrance and stroll to the right side. Phase through the gate that you find, and you will appear in a large lake with a lighthouse.

Stopping the engine: Once you make your way to the top of the lighthouse, you will see a path leading to two caves. The first cave contains a machine. Turn it on by turning the crank. Then quickly jump atop the device and shove the block down. Move it so that it locks the gears from moving. Do this quickly.

Afterward: Make your way to the bottom cave. This will trigger a cinema. Now cross over to the bottom of the lighthouse and travel to its lowest depths. There will be a section where you must align a series of blocks to connect a pipe. Once the blocks are placed, hit the switch. Jump on the bellows to get out through the ceiling. Make your way back to the bottom cave.

The Fire Glyph



Where to go: Enter the first water section in Raziel's clan area, just past the giant gate. Keep on going straight in the underwater caves and you will come to a room with all sorts of Glyph markings.

Time release door: There will be a door that you cannot open unless you turn the crank. It slams shut quickly, so you will have to enter the Spectral Realm ASAP just so you can squeeze on through to the other side.

Baby, light my fire: Use an unlit torch on the bonfire above the room with the Pillars. When you light the torch, take it back to the room with the giant statue. If you light the basket in front of it, he will give you the Fire Glyph.

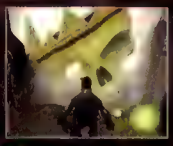
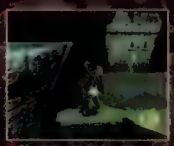
The Stone Glyph



Where to find it: Look for the entrance to Nupraptor's Fortress (where the Stone Glyph resides) in the pool of water in Melchiah's area. It's the one with the lone stone Pillar in the middle.



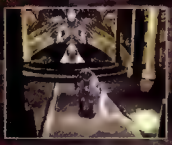
Nupraptor's keep: Climb a nearby cliff, and glide through the skull's left eye. Inside, make your way to the top by climbing up the rafters. Switch Realms to make them move.

Reaching the Glyph: Once you are at the top of the Keep, glide to the cliff on the left. Follow it to a cave that contains a giant statue. Along the sides of the room are some suspicious notches.

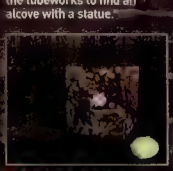
Complicated block puzzle: You must complete the hieroglyph patterns on the wall using the nearby blocks. You must stack the blocks to get at the ones that are found really high up.

The Water Glyph

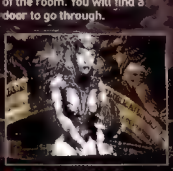
Where to find it: Underneath the bridge in the main city area, there is a gate you must destroy with the telekinetic blast. Swim up the tubeworks to find an alcove with a statue.



What to do at the statue: OK, so you're standing in front of the statue and nothing is happening. Well, look to the right in the back of the room. You will find a door to go through.



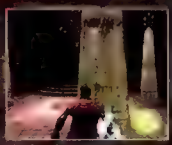
Blocking the drain: In the back room, there is a block you can pull out of the wall. Shove the block down the canal and drop it to the lower room. Place the block on the drain.



The Water Glyph received: With the drain blocked, the room will fill with water. The statue will grant you the Water Glyph for your actions.

The Force Glyph

Where to go: Head to the pool of water in Melchiah's territory just past the lake. Dive in the water and look for a cave on the right-hand side. This will take you to a hidden alcove.



The three towers: You will come to a room with three towers and a skull-like carving in the wall. The secret here is to push the towers down. After all three fall you will get the Glyph.

VI Experience

When gaining experience after a battle, all current party members who participated in the battle will divide the experience equally. For example, if you were to earn 300 experience from a battle in which you had three party members, then each would receive 100 experience. Those party members not participating in the battle will earn half as much as those who did participate.

VII Becoming a Dragoon

Use your Additions to build your Spirit Points. When your Spirit Points reach 100, you may change into your Dragoon form. The maximum amount of turns you are able to stay in Dragoon form is equal to the level that particular Dragoon is at, provided you have accumulated 100 SP per number of turns. Dragoon levels raise through Spirit Point accumulation.

In addition to having stronger attack and defense capabilities, a character effected by an abnormal status will be cured upon transforming into a Dragoon.

VIII Dragoon Additions

To perform an Addition in Dragoon form, you need to time your button presses so they coincide with the dial revolving inside the Spirit Meter. Tap the button when the dial reaches the top—doing so allows the dial to continue on to the next level. Ahn hits you gain up to four strikes against the opponent. If you perfect your timing on the button presses, you'll have a much more devastating attack added to the final strike.

IX Dragoon Magic

Dragoon Magic are based on the game's spells. To cast them, you need to be in Dragoon form and you must possess the required amount of MP (Magic Points).

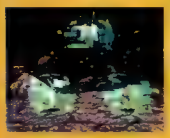
X Dragoon Special

On a rare occasion, all of your party can transform into Dragoons and have full Spirit Point meters. The Special option will appear at the end of your battle options menu. When chosen, this option will allow you to turn all three party members into Dragoons at one time. It will also grant the character who activated the Special automatic Perfects when performing Dragoon Additions.

XI Miscellaneous Notes

An unlucky [illegible] character will regain consciousness after being struck with a subsequent non-stunning attack. An enemy, who is near death (indicated by a Red Icon), will most likely cast magic as its attack.

Rose, a mysterious warrior with a troubled past, has the ability to control the darkness.



Albert's Rose Storm Dragoon Magic helps you survive some of the nastier bosses.

"You'll never *ever* lose at SmackDown! again!"

Do You Like Pancakes?

Watching The Rock do the Samoan Drop 10 or 11 times straight is just about as exciting as watching reruns of *Lassie*. Consider that fine point when you're battling against a bruising opponent. Getting the audience to appreciate you is important, and no one cares for a one-move wonder.

Oh, You Didn't Know?

One, Two . . . Is This On?

You've got plenty of moves, but you've also got the ability to kick and punch. As remedial as that may sound, it's good practice to mix up moves with an old-fashioned fist to the face or boot to the crotch. You'll also throw off your opponents timing if they don't know exactly what's coming next. With that in mind, get used to using the Irish Whip to fling your opponents off the ropes. This gives you a couple different move options, plus it's fun. And you can always scurry to the top rope to hand out an extra-special elbow to the throat.

Pimpin' Ain't Easy

Although it's not easy to reverse things, it can be done with good timing. You can reverse punches (by blocking them), you can shrug off grappling moves, you can stop ground attacks (a quick boot to the face will stop anyone), and you can sometimes stop turnbuckle attacks (by flinging your opponent into the corner for some punishment). Don't lose patience when you can't reverse a suplex, though; it's simply not going to happen. But on the attacks listed above, there's a very sharp window you can work in to save yourself from a bludgeoning.

Finishing What You Start

The most exciting part of wrestling is seeing a trademark move, and it's no different in SmackDown!. If you're playing in season mode, you'll have to wrestle until your red meter is fully juiced up to be rewarded with a green dot (a finishing move). After that, you can pick up an opponent from the canvas, and, if he's got a little wiggle in his knees, you can finish him off. Lots of times you'll get an instant KO, but sometimes you'll have to actually pin after the smack has been laid down. Pinning or not, it's the way to lift the crowd (and yourself) to its feet.

Pre-Season Mania

If you happened to have enough time on your hands and complete the following number of pre-seasons, you'll be rewarded with what's listed below. As grueling as ten pre-seasons could be, remember: Patience pays off.

1: Wealth
2: European Title and Ability
3: Women's Title and Ability
4: Tournament and Ability
5: Hardcore Title and Ability
6: IC Title and Ability
7: Tag Title and Ability
8: Title Match and Ability
9: Nothing
10: Pre-season Skip

Hidden Jabronis

As you play through an entire season in SmackDown! (after the Wrestlemania dust has settled), you'll either unlock secret characters or get extra attribute points for your created wrestler. Here's a list of what you'll unlock each year.

1st year: Ivory
2nd year: Prince Albert
3rd year: Jaqueline
4th year: Viscera
5th year: 80 points for created wrestlers
6th year: Mideon
7th year: Gerald Brisco
8th year: Pat Patterson
9th year: 90 points for created wrestlers

In the middle of the game, press Start to pause. Now enter any of these button codes for these results. You will hear a sound to confirm that you entered the code.

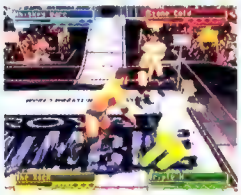
Winning Lines

What makes WWF SmackDown great is the laundry list of different matches you'll engage in over the course of a season.

1 Tag Match

Pretty basic stuff. Beat up the other guy and pin him—just be sure to remember to tag in your partner. Don't think you can go it alone. We know it's not fun to try reaching over the ropes to wreak havoc, but it makes for more fun when you get back in the ring. Also, when you're ready to try to pin, try to do it near your corner. That way your mate won't let your opponent interrupt.

2 Battle Royal



In this festival of fighting you'll have to eliminate three opponents by pinning them. It's a last man standing affair, so there are two things you need to do: survive, and pin the last guy. The best thing to do is to stay out of the eye of the fight and only jump in when you can really work someone over. Jumping to the outside for space reasons isn't a bad idea either.

3 Handicap Match

With these matches there is one major consideration: get used to changing your focus. With two or three guys bearing down on you, timing is the key to survival. Use a lot of ready moves on your first challenger to get him down, then go to the punches and kicks. Try to let the different guys beat up on you so they don't build up energy for a finisher. Try to attack the same guy as much as you can so that when you get a chance for a finisher you can knock him out and be done with him. This is one of the toughest challenges.

4 Hard Core

The key to this match is knowing when too much is enough. There are plenty of opportunities for you to crack some guy over the head with a steel chair and chop him down like a tree, but there comes a time when you'll need to just wrestle. Use grapple moves when you're being charged at with a weapon. A quick suplex, DDT, or even something as simple as a snapmare will disarm your opponent and put you in control.

5 Cage Match

Inside the gruesome cage you'll have only one way to win: get out. CPU opponents will make a beeline to the outside on the first chance they get, so be ready to knock them off using the Circle button. It takes 12 seconds from start to finish once you've gripped the cage walls. No matter what condition you're in, you'll still go the same speed. Take a couple shots at the outside, but be prepared for a longer match. Sometimes patience is best.

6 Special Referee

Special Referee matches are pretty much up for grabs. If you're locked into a season and the guest ref has it in for you, forget about it. If he's on your side, however, that's a big bonus. Special Referee matches can be one of the best aspects of the game, and there are even some strategies to help win. First, try pinning early. You never know when you might get a quick count, and it will also give you a sense if you're going to get a slow count. Secondly, don't ever hit the ref unless he hits you first. If he attacks you, then you're probably going to get cheated anyway, so you might as well knock some heads in the process. Also, notice if your opponent takes out any aggression on the referee. If he does, go for the pin soon after that. Final advice: If you're the special referee, take some free shots. Why not?

7 Royal Rumble

This impossible event will frustrate you to no end. Trust us. Try running away and staying out of the eye of the action. Remember to kick at opponents you've just thrown out of the ring in case they hold on, and be ready for Irish Whip reversals to ruin your fun.

8 Survival Match

Rather than having to battle through a 3- or 4-Way Dance, only one competitor has to be knocked out or pinned for a winner to be declared. One of the best things to do is to save up your finishing moves until your opponents are weak. Once they're less than conscious, throw a finisher on them and hope it will knock them out. Otherwise, be sure to keep your eye on how everyone else is doing. If you don't pay attention, someone else might get pinned and you'll be out a win.

9 I Quit

This is one of the cooler matches included in the game. Just because it's an "I Quit" match, though, doesn't mean a submission move can finish it. While battling, find the microphone. It could be in the ring, right outside the ring, or in an altogether different part of the arena. Use the Irish Whip to fling players into the arena you're battling in if the mic isn't located around the ring. Once you've thrown a good trouncing on your enemy, grab the microphone (using R1) and use the command to pin him (Down and Circle). You'll mount up and hold the microphone to his mouth. If he's taken enough punishment, he'll give up. If he hasn't, then it's time to throw him around some more.

STREET FIGHTER EX2 PLUS

THE GAME ENGINE

BASICS: Street Fighter EX2 Plus plays like a strange mix of classic Street Fighter 2 and the Alpha games. There's no air-blocking, but there are plenty of big Combos, Supers, and Juggles. One thing that will definitely throw you off if you're used to other recent SF games is the timing. You can pull off Normal Combos very slowly and still have them connect, while Excels have to be done very quickly. Most importantly, the time it takes to come out of Block Stun or get up off the ground is extremely long. You'll need to adjust your timing for doing wake-up attacks or reversals. It definitely takes some getting used to.

SUPERS: For the most part, the Supers are like those in Alpha 2. You can store three Supers at a time, though there is only one level per Super. Supers generally have high priority and will beat other attacks. Thus, an effective technique is the aptly named "Scrub Trick." Jump in on your foe and attack early so your attack misses (you want this). When you land, use a Super. The common reaction is to try to throw you when you land. If your opponents try something, they'll eat the Super. Each character also has at least one Meteor Combo, which is just a level three-only Super. By itself, it does massive damage. It does less damage in a Combo, so use it alone unless you're trying to showcase.

SUPER CANCELS: You can Cancel almost any Special move into just about any Super. To do so, just perform the Super command after landing the Special move. It is also possible to Cancel one Super into another—just perform the second Super command sometime while the first Super is hitting. You'll want to avoid this kind of Super Canceling, though, because it wastes energy. If your favorite character has a good Super Cancel, on the other hand, by all means, use it.

GUARD BREAKS: To use a Guard Break, press any Punch and Kick of the same strength together. This slow attack takes one Super Bar and cannot be Guarded. Guard Breaks leave your foes open to attack if they hit them on the ground; if you hit someone who's airborne, they'll float for your juggling pleasure.

New to SF EX2+ are Cancel Breaks. Cancel Breaks work like Super Cancels—use a Guard Break while attacking with a Special move or Super and you'll Cancel the attack into the Guard Break. This can be very useful if your Super was guarded and you'll be open to attack when it ends.

EXCELS: Also new to SF EX2+ are Excels. A strange marriage of Alpha 2's Custom Combos and Alpha 3's Variable Combos, Excels take one Super Bar and are activated by pressing any Punch and Kick of differing strengths. The Excel only lasts a short time, but while active, you can chain almost any normal or Special attack into itself or any other attack—plus you'll be free to move and Jump as you please. Although getting hit doesn't cancel the effect, it's likely to use up your remaining time. You can't perform Supers during an Excel, but you can Combo into one from the last hit.

Mr. Driller™

BASIC STRATEGIES

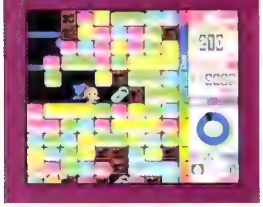
Like many of the best games, Mr. Driller is easy to learn and very difficult to master. Only by playing it repeatedly will you have the chance to learn its intricacies and enter the "driller groove," where you instinctively know exactly where to dig next.

The most basic advice for the game is given during the intro sequence: "Drill as fast as you can!" In order to get through the game effectively, you need to be incredibly fast with your drill. Despite that important advice, quick drilling is not what the entire game is about. No, Mr. Driller is not only about being fast, it's about quick thinking as well.

A technique that you will have to learn early in the game is digging a hole, grabbing an Air Capsule and bolting out of there before the blocks it was supporting come crashing down on you.

Remember that you can also dig up and clear blocks that are hovering and about to fall. That simple move can easily save Driller's life.

One last thing: If you have a controller with Turbo Fire, use it. It will make digging through all those block a lot easier.

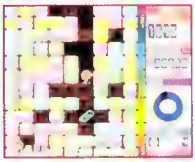


COMBOS

Mr. Driller just wouldn't be a real puzzle game if it didn't feature combos, so mastering combos is the best way to clear stages quickly and earn big points.

As you drill downward, keep a sharp eye on how the blocks are positioned. Sometimes taking out certain blocks can start a chain reaction that will eliminate huge sections of blocks with just a single motion of your drill. Just be careful—sometimes chain combos will cause lone blocks to come crashing down to where you're standing.

Also, make sure that you're not spending too much time trying to set up combos. The goal is to get to the bottom—the combos will follow if you hurry.



X-BLOCKS

The cursed X-Blocks. You will learn to hate these brown-colored barriers almost immediately. In addition to taking five hits to destroy, they also sap 20 percent of your Air. Unfortunately, in the later levels, most of the Air Capsules are surrounded by them. When this happens, you'll need to set up a combo for the X-Blocks to make them disappear.

Be sure not to trap yourself in a situation where you're surrounded by X-Blocks on all sides. The only way to escape this trap is to dig your way out, and that costs you precious Air.

STAYIN' ALIVE

Once you really get into the game, you'll find that there's so much going on. It's easy to lose track of things and unnecessarily lose a life. You need to be extra alert once the action starts to get hectic.

Your main concern should be falling blocks. When at all possible, try to dig in a straight column to avoid having bricks falling from above.

While you're dodging falling blocks, keep a watchful eye on your Air Gauge. You don't regain Air between levels, so go out of your way to get the Air Capsules. You even get bonus points for them, so there's no excuse for being caught short of breath.

Overall, the most important thing is to keep moving. If you're constantly on the go, the chances of getting hit by a block decreases significantly. Nothing is more embarrassing that being crushed after completing a huge combo.

TIME ATTACK

After honing your skills in Arcade Mode, it's time to check out Time Attack Mode. This is where the real challenge of the game is. As in Arcade Mode, the goal is to get to the bottom as quickly as possible. This time, however, that's your only goal. Don't waste time trying to set up combos as there's no point to it in this mode. There's not even an Air Meter in Time Attack, so that's one other worry off your back. To clear each stage, however, you must reach the bottom within a very strict time limit.

Replacing the Air Capsules in this mode are the Clocks. If you are even thinking about getting through this mode, you'll need to become familiar with them fast. The Clocks all have numbers on them, and collecting them removes that many seconds from your timer (generally between one to three seconds). While that may not sound like much, a second can mean the difference between clearing the course and having to start all over.

Prepare to play through these courses multiple times. The way that they're laid out, you'll need to move though them quickly and nearly flawlessly in order to beat the given time. It's a lot of effort, but if you can do it, consider yourself a master driller.

AFTER TIME ATTACK

Those Time Attack puzzles may have been tough, but you're only half through. Once you beat all the Time Attack levels, the "reverse" levels open up. These puzzles are even more challenging than the normal ones, and you have much less time to complete them in! Many of the strategies for the Time Attack Mode still apply, so you'll be able to beat them with practice. Just remember that you'll need to move fast and flawlessly.

Once you beat all the reverse stages, you will earn a new outfit for Mr. Driller. At the title screen, hit Select to change Mr. Driller into his stylish new blue outfit. It may not be much, but it's a nice change.
